\$35,000 NEW LENOX SCHOOL PROJECT

Call Special Election June 4 on \$10,000 Bond Issue, Dist. Part of Cost

The New Lenox public school has grown too small to accommodate the large number of pupils which have been added to the school attendance with the enlarging of the subdivisions around New Lenox. A few years ago a portable addition was built but this has also been outgrown. The need for a larger school is imperative. The local Board of Education has taken the matter up with the WPA relative to the enlarging of the school and repairing the present building. Word has been received that the new project will cost approximately \$35,000 of which the school district will be required to raise \$10,799. The WPA will pay for the labor and on the material cost.

A special election has been called for Saturday, June 4th at the school house. Polls will be open from 7 a. m. to 6 p. m. President Dewey, Moore of the New Lenox Board of Education states that the proposed bond issue will not raise the school district taxes in any way. If the bond issue carries work on the new project will be started this summer.

Mokena PTA Prepares to Start Summer Roundup

Dr. A. J. Levy of the State Department of Public Health gave an interesting talk on the "Benefits of Immunization and the Summer Round-Up" at the last P. T. A. meeting, Tuesday, May 24.

The Round-up is merely a routine inspection of the child to check over his physical health. So often, the parents think the child is perfectly healthy simply because he is not sick in bed. There may be some small defect, which if allowed to continue, would become a major or serious handicap to his well-being if not remedied.

With the summer months ahead of you and the knowledge that you have an obligation to fulfill, you can go to your physician and dentist and, in a short time, have your child in A-1 condition before fall.

With the advent of warm weather Dr. Levy warned us to be on the look-out for whooping cough. The "shots" for that are simple and effective, can prevent or alleviate the distress arising from this annoying disease.

Vaccination against small-pox and the diphtheria toxoids are two other vital necessities to the health of the child. He warned that previous vaccination did not indicate one was immune for life. The Schick test for diphtheria is the only positive proof of whether one is susceptible to the disease or not. It should be made every two or three years.

Following a discussion of problems and questions on child and community health, Dr. Levy showed several films of much interest to everyone. The first was on Posture; 2nd, preparation of diphtheria toxoids; and the last two on the pasteurization of milk.

The pasteurizing of milk is the heating of milk to 143.5 degrees F and keeping it there for 30 minutes. Then rapid cooling to 50 degrees F before being bottled and sold. This process renders the germs of scarlet fever and other communicable diseases inactive, and therefore makes this vital health food safer to use.

The PTA hope they will have the active cooperation of the parents in the summer campaign, and they assure the parents they will not regret it.

The PTA extend their sincere appreciation to Mr. Alvin Sorenson for the use of his fine movie projector and for his time spent in operating the machine.

St. Mary's Parish Mokena Preparing For June Festival

Plans are rapidly being completed for St. Mary's June Festival to be held in St. John's church basement, Sunday, June 5, 1938.

The ladies will serve a delicious dinner, cafeteria style, main course consisting of a choice of chicken or baked ham which will be prepared by the Columbia Baking Co. of Joliet, and will be served from 4:30 p. m. on.

Concession committee has arranged a variety of interesting booths including bingo, dart game, etc. In the evening a beautiful lounge chair and a hand made quilt will be awarded. Everyone is cordially invited.

MISS RUTH WOOD, NEW LENOX, A PRETTY BRIDE

Before an altar banked with spring flowers, Miss Ruth Wood daughter of Mr. and Mrs. Wm. Wood of New Lenox, became the bride of Russell Bettenhausen, son of Mr. and Mrs. Ben Bettenhausen of Tinley Park, at a beautiful wedding on the lawn of the Wood home at seven o'clock Saturday evening, May 21. The Rev. Mr. Wm. Ellis, pastor of the New Lenox Methodist church officiated.

Preceding the ceremony, Mrs. Robert Wood of Chicago, aunt of the bride, sang, "Oh Promise Me" and later during the service she sang, "I Love You Truly."

As the Lohengrin wedding march was played, the bridal party took their places at the altar. The bride, who entered on the arm of her father, who gave her in marriage, was beautifully gowned in a raspberry crepe of street length, with matching accessories and a shower bouquet of Talisman roses and sweet peas.

Mrs. Helen Wood, served her sister as matron of honor. She wore a gown of brown print crepe with blue accessories and a shower bouquet of Talisman roses and sweet peas.

Mr. Paul Bettenhausen served his brother as best man.

Immediately after the ceremony, a reception was held for sixty-eight relatives and friends.

Mr. and Mrs. Bettenhausen left on a short wedding trip and will be at home, upon their return, in Tinley Park.

The guests were: Mrs. Harriet Bettenhausen, daughters, Ella and Mae, Mr. and Mrs. LeRoy Breen and son, Mrs. Paul Draper and daughter Darlene, Willis and Dorothy Seybold, Marie Harvie, Mr. and Mrs. Robt. Wood and Rev. and Mrs. Boyer all of Chicago, Mr. and Mrs. Fred Brewer of Riverside; Everett Warren of Blue Island; Mr. and Mrs. Earl Ulrich of Green Garden; Mr. and Mrs. Fred Breitbarth of Midlothian;

Also Mr. and Mrs. San Brunner and family, Mr. and Mrs. Joseph Andres, Mr. and Mrs. Wm. Andres, C. C. Bettenhausen, Mr. and Mrs. Ben Bettenhausen and son Paul all of Tinley Park. Mr. and Mrs. Mansfield Kohl of Mokena; Mrs. Gott and daughter Helen, Joseph Kambe, Verna Hartley, Leonard Crowder, Mr. and Mrs. Elmer Gillette, Miss Wheelock, Mrs. Helen Gillette and children, Mr. and Mrs. Fred Wood and children, Mr. and Mrs. Chas. Reese and Mrs. Linder all of Joliet.

Rev. and Mrs. Wm. Ellis, Mr. and Mrs. Dewey Moore and son, of New Lenox.

Frankfort Firemen Get New Badges

The Frankfort Fire Department is going to town. The members have received their new badges and caps. The Frankfort firemen have joined the Suburban Community Firemen's Association composed of Will and Cook County fire departments and attended 17 strong the meeting held Monday night at Hazelcrest. The Frankfort firemen are much interested in their new department.

Banks, Postoffices Close Monday

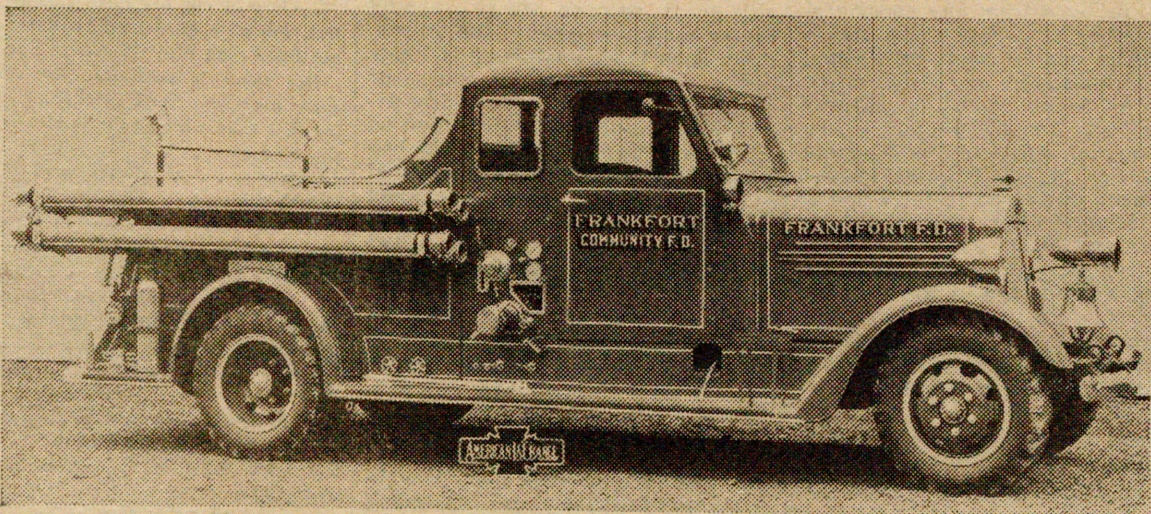

Monday all banks, postoffices as well as many business places will remain closed in observance of Memorial Day.

At Frankfort there will be one incoming and one out going mail Monday morning and the postoffice will close at 9 a. m. No rural mail delivery that day.

Frankfort to Vote On Municipal Bldg., Bond Issue

Plans are going ahead for the new municipal building which the village of Frankfort proposes to erect soon. A special election will be called the forepart of July to vote on a \$11,000. bond issue to pay for the construction of the new hall which is to house the village hall, fire department, etc. The election will be held in the old village hall.

New Frankfort Fire Truck Responds To First Fire Call; Makes 4 Mile Run In 5 Minutes; Saves Farm Building

The new Frankfort fire truck responded to its first fire call late Thursday afternoon when a call came in from Chas. Mark, residing on the Dr. W. V. Hedges's farm, four miles south of Frankfort on route 45, that lightning had struck the farm home and set the roof ablaze very quickly.

The fire siren was blown in Frankfort and in a few seconds the firemen were ready to start and made the run of four miles in 5 minutes. Arriving at the Mark place they quickly got the truck's booster tank into action and extinguished the blaze very quickly.

The bolt tore a window frame out of the building and cracked a wall and broke a number of window panes. Both Mr. Mark and Dr. Hedges are highly elated over the fine work done by the Frankfort Fire Department and over the fine performance of the new truck.

Mokena Plans Memorial Program At School Aud.

Plans for the observance of Memorial Day in Mokena have been perfected and the program is to be as follows: Exercises will begin promptly at 10 o'clock in the Mokena public school auditorium. The Mokena school band and the school children will supply the musical program. Rev. W. J. Geffert and Rev. Theo. Haeefe will be the speakers. Wm. Semmler will read the veteran's roll call following which taps will be sounded. Prof. G. Dunn, principal of Mokena public school will be chairman of the day. The pledge of allegiance will be given by the pupils of the school.

There are 14 soldiers graves in the three Mokena cemeteries which are quite a distance apart and too far for the children to march to. Wm. Semmler and his aids will place flowers and flags on the graves before the exercises are held. A very good program has been prepared and everyone is heartily invited to attend and show respect to the memory of the heroes of our nation.

Mokena Makes Baseball History

Last Sunday Mokena made baseball history. A no hit, no run game, a triple play, net result a score of 1 to 0 favor of the Mokena married men, all for the price of one. A bargain in any man's town.

Pat Homerday put on a real hand of pitching and what the Orioles got was immediately smothered. The married men scored their lone run early in the 2nd inning and had to be content with that in spite of a total of 7 hits.

The local elevator boys Fritz and Dob accounted for two of them. Sorney Sorenson, manager of the Mokena Sorensens must have been sure of something because he smacked everything that was offered to him.

Off the record it looked like he battled 1000.

Here is the picture: Married men at bat leading by a score of 1 to 0 in the 8th, 10 outs, bases loaded. R. Guindon lines a driver right down the third base line, Bormet makes a dive dashes over touches bag, wings it to Frisch at 2nd. Result 3 outs, a triple play.

Sunday the Orioles play the same setup. Monday they play the Chicago Heights Owls. Monday is ladies day with or without coupons.

Memorial Day Dance at Frankfort

A Memorial Day dance will be held at the Frankfort Grove north of Frankfort on route 45 on Monday night, May 30. Music will be by Harry Habberkorn and his orchestra. Everyone is invited.

Mokena YPL To Hold Carnival

The Annual St. John's Young Peoples League Carnival will be held in the village park on June 22. Please keep this date open.

Mokena PTA To Provide Youth Entertainment

The Mokena PTA is happy to announce that their plans for a summer entertainment for the children are completed and that they have been received with enthusiasm.

The PTA will have the services of three highly recommended young people of Joliet, who are well qualified and experienced, to provide the youngsters with the kind of entertainment and instructions which all parents so eagerly seek for their children.

Miss Andrews will have charge of the boys and girls from 4 to 7 years, inclusive. She will give them the regular kindergarten training, providing them with instructional work, playing games, reading stories, dramatizing them. The four and five year old children will be entertained in the morning from 9 to 12. The 6 and 7 year old children, from 1 to 4, with games and instructions to suit their age. Miss Andrews has had two years of junior college and one year of practice teaching in Joliet.

Miss G. Highland will take care of the girls from 8 to 14 years. She was a girl scout for 8 years and has attended 4 courses of leaders classes and was assistant leader at a girl scout camp last summer. She is well acquainted with all the activities of girl scout life and will be able to impart to the girls a finer sense for the beauty of nature. Under her leadership they will enjoy hiking thru the woods, learning about tree blazing, studying plant life, trees, preparing their own meals in the open. There is an almost limitless number of games and songs which they will enjoy playing and singing. The girls can, if they like, make puppets, learning to manipulate them, choosing their own parts and presenting a show all their own.

Beadwork, weaving, leaf mounting and collections of all kinds will capture their interest. Mr. Chas. Hughes will provide the boys with entertainment. He has had two years of college and was outstanding as a boy scout and also in manual training work. He will show the boys what a grand thing it is to know nature as a boy scout does. He will teach them to make bird houses, tool boxes, hammering tin into useful articles, working with leather, making model airplanes etc.

The boys will have a great time, hiking, campfire cooking, collecting butterflies etc.

These classes will be held for 8 weeks every Tuesday and Friday from 9 to 4 beginning June 7. Although the leaders are paid by the PTA, children are asked to contribute 10c a week toward the expenses if at all possible.

The most simple play clothes and overalls are recommended. We hope that all the parents in our community will give us their cooperation, for no doubt the children will appreciate what is being done for them. The committee will be glad to answer any inquiries about this project.

SIGNED: Mrs. L. Thiel, Chairman, Mrs. A. Shoop, Tel. 22-W and Mrs. R. Krapp, Tel. 63-R, Mokena.

MEMORIAL DAY BALL GAME AT TINLEY PARK

A Memorial Day game will probably be played in Tinley this coming Monday at 2:30. Watch for posters in town for further announcements.

The Tinley Park baseball team will travel to Dolton Sunday to play the Dolton Tigers.

PROF. CLARE TO ADDRESS MOKENA GRADUATES

The annual commencement exercises of the Mokena grade and high schools will be held in the school auditorium on Wednesday night, June 1st, commencing at 8 p. m. DST. The program will be as follows:

Processional.
Invocation—Rev. T. M. Haeefe.
Song—"Allah's Holiday," 7th and 9th grades.

Song—"Oh Dear," 7th and 9th grades.

Introduction of speaker—Rev. T. M. Haeefe.

Address—"I Can," Prof. Thomas Clare.

Presentation of Diplomas—Lawrence Kohl.

Benediction—Rev. C. P. Knight.

Following are the high school graduates: Marvin Cappel, Frederick Clark, Mildred Cooper, Geo. Hentsch, Charles Hostert, Adaline Lahmann, Oliver Lauffer, Ejnar Monson, Kenneth Warning.

The grade school graduates are: Russell Bennett, Charles Burkhardt, Chester Corney, LaVerne Gunhouse, Lillian Hellmuth, Earl Hostert, Arthur Hurley, Alvin Lauffer, Esther Lauffer, Ruth Lowe, Betty Marti, Evelyn Meyer, Jack Nordsell, Melvin Nordsell, Earl Schoeneck, Elaine Stanger, Ruth Thiry.

The baccalaureate service will be held at the St. John Evangelical church, Sunday night, May 29th, at 7:45 o'clock DST.

Will Hold Memorial Exercises In New Lenox

The annual New Lenox Memorial exercises will be held next Monday morning at 10 a. m. sharp in the New Lenox school auditorium. Rev. Chas. R. Ross, pastor of the Ottawa St., M. E. church, Joliet will be the speaker of the day. James Gurley, principal of the New Lenox school will be chairman of the day. The New Lenox band will furnish the music. At the close of the exercises the school children will decorate the soldiers graves in the Maplewood cemetery with flags and flowers.

The band will play at the Orland Park Memorial exercises in the afternoon.

New Lenox Band To Hold Dance

The New Lenox band is sponsoring a dance Friday night, May 27 in the New Lenox school gym. Dancing will be from 9 to 1. DST. Music will be furnished by a new novelty orchestra and a good time is assured all who attend. Bingo will also be played. Proceeds from the dance will be used for the purchase of new uniforms and needed band equipment.

Coming Events

May 28—Out door movies Orland Park and Tinley Park.

May 28—Community sing Mokena coupon auction sale near Sippel Store.

June 1—Mokena Grade and High School commencement.

June 5—St. Mary Catholic church Mokena June festival.

June 19—Chris Luth, church picnic, Orland Park.

June 22—YPL Carnival Mokena.

Washington Digest

National Topics Interpreted
by William Bruckart
National Press Building Washington, D. C.

Washington.—Almost before its operation is well started, the new federal crop law appears to be bogging down. From what I hear around the offices of senators and representatives at the Capitol, there is plenty of rebellion against the law which is supposed to plan agriculture on a scientific basis. Indeed, if one reads some of the letters, the conclusion is inescapable that Secretary Wallace and his "scientific planners" are going to have more trouble than a one-armed paper hanger in administering that law.

Crop Law Bogs Down

It is difficult to provide a clear analysis of the trouble because of the complex character of the law, the confusion as to what can and cannot be done under its provisions, the varying attitude of the farmers who are its "beneficiaries" or its "victims," according to their views. The problem of telling what is wrong is made more difficult because practical people seem to be unable to get anywhere in their efforts to get the "scientific planners" to recognize human nature as well as the material forces that must be considered in farming.

I have talked with a number of Department of Agriculture people; individuals who are supposed to understand the crop control law. They are most convincing; the pen-and-ink sketches that they have made leave only the question as to the reaction of human beings. The department propaganda surely is sufficient to smother any criticism. It is formidable. But it, also, leaves that question of human relationships, wind and weather, to be determined. Even in that regard, every now and then Secretary Wallace issues a statement or makes a speech which seems to do away with any possibility of trouble from those influences.

In the meantime, however, the cotton growers of the South went into a rebellion about the acreage allotment. They succeeded in getting, rather in forcing, Secretary Wallace to obtain congressional action allowing for an increase of 2,000,000 acres of production this year. He went after that legislative action as an emergency, and there was plenty of sentiment in congress for it, because as a matter of cold fact there is a very large majority in the house and senate who doubt that the new crop control law is going to work. To the request for additional acreage, therefore, there was only a little objection since additional acreage meant an obvious increase in general production with the chance for increased return to the farmers who grow the cotton.

Only lately, another tidal wave of rebellion developed. It came from the corn farmers. They had received their allotments of acreage and, like the cotton farmers, they found themselves between the upper and nether millstones. Their rebellion surely lent credence to statements in debate when congress was considering the bill that it conferred more power on a federal agency than ever ought to be conferred in a free country, and that there was no possibility of this power being exercised wisely since none knew its scope. The cotton and corn revolt, therefore, would seem to support assertions in the senate that the two chief sponsors of the bill, Senators Pope of Idaho and McGill of Kansas, had no understanding of the measure they were fighting for. At least, the explanations they made never were able to permeate what I am pleased to refer to as my brain.

The corn protestors made their first concentrated move only recently at Macomb, Ill., and the sum and substance of that meeting seems to be that those farmers have had their bellies full of compulsory crop control. They called it un-American; they described it as ruinous and pledged united action against its continuation.

Of course, no one in Washington can tell exactly how many farmers are in sympathy with the position taken at the Macomb meeting. There are 566 counties in what is designated as the corn area. Whether there is a large majority against the compulsory, dictatorial type of law, or whether there is only a sizable minority can not now be accurately stated. It can be stated as a definite fact, however, that farmers do not spend their money to go several hundred miles for a meeting of protest unless they are being badly damaged. Communists and other radicals would go dashing anywhere to hold a protest meeting, but farmers are not built that way. So the Macomb meeting must be taken seriously. It must be given additional weight as well because it followed on the heels of heated protests from the cotton growers.

As to the number of farmers represented in the Macomb meeting; that is to say, the farms and farmers represented by that protest, it might be enlightening to quote here the published statement of Claude

R. Wickard. Mr. Wickard is a divisional AAA director and one of the really close advisors to Secretary Wallace. Said Mr. Wickard: "Complaints have come against the corn allotments as high as 1,100 from one county."

Obviously there could not be that many complaints from more than a limited number of counties. But even if there are only half that number of protests from any considerable number of counties, the representatives and senators who voted for that legislation are bound to get plenty of kicks in the pants next November. And the plight of those members of the house and senate appears to be made worse by the statement attributed to the Department of Agriculture by Representative Andresen of Minnesota. Apparently, Mr. Andresen had been getting baskets full of kicks about the acreage allotments and went to the department to find out the facts. He returned to tell his colleagues on the floor of the house:

"The administration (AAA) will not yield an inch. The allotments have been made according to law and the farmers can take them or leave them."

In that statement, it seems to me, there is unbounded arrogance and Mr. Andresen did the country a service when he repeated it to the house of representatives. It is an attitude of the dictator, of the worst sort of regimentation and it bears out the very thing which Senator Borah of Idaho predicted would happen when he opposed the legislation. Senator Borah's blast in the debate was, of course, branded as the criticism of a Republican, and it was his colleague, Senator Pope, the Idaho New Dealer, who was running about the country last year as the chief member of a committee of senators which was drumming up sentiment for the legislation before the extra session of congress called last November.

By way of prediction, I think there can be no doubt that the wheat farmers will find themselves shocked, instead of their wheat, when they get their acreage allotments later. They will find that the law is compulsory, not one of free co-operation as advertised when the bill was being debated in congress.

What is the reason for these conditions? Why is there rebellion among the farmers when, according to Secretary Wallace, there was a great majority for application of the crop control provisions?

Frankly, I believe there are several factors to be considered as having influenced the passage and subsequent application of the compulsory regimentation.

In the first instance, it is quite apparent now that many representatives and senators were subjected to red hot steam from professional farm lobbyists, from Secretary Wallace and his lobbyists and from the minority of farmers who wanted something, anything, that would cause the government to pay them money. That belief is predicated upon a knowledge that the vast majority of the farmers are too busy with their own affairs to be active in politics. The legislators thought they were doing what the farmers wanted them to do.

In the second place, there surely was much misrepresentation about the legislation. At all times and on all occasions, Secretary Wallace and those who were seeking to put over the legislation vigorously stressed the statement that the provisions of the plan were voluntary. There was to be no compulsion in it; the farmers themselves were to decide; the department here in Washington would do exactly what the farmers wanted. All of which is very well and good, except that the farmers were not informed how much pressure could be exerted to make them volunteer. They either had to "volunteer" or find they could market none of their product without being penalized.

What is the result going to be? Congress soon will be quitting for the year, and there is no likelihood of any amendment that will alter the situation—unless something intervenes to keep congress in session far into the summer months. The only thing to look forward to, then, is the result of the fall elections. If the revolt that is represented by the protests of the cotton and corn farmers is widespread, it will show up in the votes at election time. Those who fought so hard for it in congress will meet trouble in primaries and in the election as well. To me, however, there is an added significance. These protests reveal a growing sentiment among farmers, a resentment, against having the federal government bureaucrats run the farms from Washington.

Puerto Rico a Flower Garden

The tropical island of Puerto Rico is a veritable flower, with 3,353 varieties of brilliantly colored flowers growing on its mountains and coastal plains.

FARM TOPICS

WILDLIFE AIDS IN CHECKING EROSION

Animals Devour or Trample Scanty Pasturage.

Supplied by the United States Department of Agriculture.—WNU Service.

One great difference between domestic and wild birds and animals is the effect they have on the topsoil, particularly on soil erosion. It is common for farmers to pasture fields already injured by erosion—gullied land too rough for machine tillage or patches where running water has taken most of the topsoil. On such land, pasturage is likely to be scanty. If cattle, sheep or hogs are turned in they usually devour or trample such vegetation as may be left, says Dr. Ira N. Gabrielson of the bureau of biological survey. This increases the erosion damage.

Wildlife, in contrast, lives in and with the natural vegetation that develops in these rough areas not suitable for cropping. Rarely do creatures of the wild contribute to erosion. Rather, they allow vegetation to develop and hold the soil. Farmers can help, too, says Doctor Gabrielson, by seeding or planting quick-growing plants and trees that are soil binders and also provide cover and food for game. Catering slightly to the feeding and nesting habits of the game will attract birds and animals and increase the game crop which sportsmen will be glad to harvest—and pay for the privilege.

Domestic animals are likely to further destroy land that has been injured by cultivation. The same land devoted to wildlife will be preserved and even improved. This contrast often points out the difference between good management and poor management of the rougher and less fertile parts of a farm.

Hens Have Colds; Roup More Severe Infection

Much that is called roup is more of the nature of colds and the fowls affected will recover if given clean, dry quarters, free from direct drafts but with ample ventilation, advises an expert in the Rural New-Yorker.

True roup is a more severe infection and it cannot be said that any remedy known to poultrymen is efficacious to cure it. Any sick birds should be removed from contact with the healthy members of the flock to prevent spread of the infection. A fowl showing roup in at all severe form is of little or no value, and usually may be disposed of to the advantage of flock and owner.

It should be borne in mind, however, that all colds are not roup and that recoveries from the former under good care may give an unwarranted reputation for value to whatever is used in treatment.

Minerals for Hens

The lime needed by laying hens is cheaply and satisfactorily supplied in crushed oyster shells. A limestone grit may also be used as a source of this element. Milk and the meat scrap, customarily made part of the poultry rations, add other minerals and the addition of iron, sulphur, iodine, etc., as separate ingredients, lacks demonstration of its necessity, if nothing more. While minerals are essential elements of a poultry ration, they are found in the grains and supplements commonly fed, as they are also in the grains and roughage of dairy feeds.

Bone Meal Valuable

Many experiments have been conducted throughout the world to determine the availability of calcium and phosphorus in different forms. Results show that sterilized bone meal is as available as other chemical forms that are soluble in water. Feeding large quantities of minerals to animals that they do not require may be definitely detrimental. Indications of mineral deficiency should be taken up with the agricultural experiment station, where such problems can be investigated and recommendations made according to the requirements.

Weeds Add to Expenses

Weeds are expensive. It is estimated that they cost, on the average, \$2 per tillable acre of soil. That means that on a 100-acre farm, the loss would amount to \$200, a sum that would go far toward paying the taxes on that land. The loss caused by weeds includes not only yields, but also much extra labor, dockage in marketing, poisoning of live stock and increase in plant diseases and insect pests harbored by weeds.

Nests for Turkeys

Where breeding plans include only making the best of things at hand, a good kind of nest for turkeys is the simply constructed A-type coop, according to a poultryman in the Los Angeles Times. In placing these coops for hens, a depression should be scooped in the ground under them and, if the weather is dry, three or four gallons of water should be poured in each hole several days before making up the nest. This is to provide a supply of moisture.

Only a Few Days Are Left to Enter Our Cake Recipe Contest

Send in Your Favorite Recipe
Today—You May Win
a Cash Prize

First Prize \$25.00
★
Five Second Prizes \$10.00
Each
★
Ten Third Prizes \$5.00
Each

ONLY a few days are left before the close of our big Cake Recipe Contest. For all entries must be postmarked not later than May 31, 1938.

But there is still time for you to enter a recipe. Send in the directions for that cake which your family says is the best ever . . . which you bake for company . . . or always send to the church fair.

It will only take a few moments of your time to write out the recipe and you have nothing to buy . . . no letter to write. There never was an easier contest! Just fill out the attached coupon calling for your name, address, the brand of shortening, baking powder and flour used in your cake. Clip the coupon to the recipe and mail it to C. Houston Goudiss, author of the "WHAT TO EAT AND WHY" series in this newspaper.

16 Cash Prizes.

The winning cakes will be selected by the experienced home economists on the staff of the Experimental Kitchen Laboratory that he maintains in New York City.

Prize winning recipes, together with

those receiving honorable mention from the judges, will be printed in a booklet, to be distributed nationally.

Simple or Elaborate Recipe.

There are no restrictions as to the type of recipe that may be submitted. Your favorite cake may be plain or frosted. It may be baked in layers or in a loaf—put together with a cream filling or topped with a meringue. It may be chocolate, maple, mocha, spiced, Devil's Food, a jelly roll or a Lady Baltimore. The proof will be in the eating!

That \$25.00 first prize would come in handy for buying summer clothes or something special that you want for the house. You have nothing to lose, everything to gain, so why not write out your recipe—now. Attach the coupon and mail it to C. Houston Goudiss, 6 East 39th Street, New York City.

CHEW LONG BILL NAVY TOBACCO

5¢ PLUG

WHAT!
A FIRESTONE
TIRE AT
25% LESS?
I'LL TAKE A SET
RIGHT NOW!

FIRESTONE Gives You This High Quality Tire at This New Low Price

Because Firestone saves money by controlling and securing rubber and cotton at the sources and by more efficient manufacturing and distributing. These savings make possible extra values at low prices. You get:

High Quality—First choice rubber and selected cotton that conform to Firestone's high standards and rigid specifications.

Long Mileage—Safe, silent tread design made of tough, slow wearing rubber that assures long mileage. Sturdy bars and rugged notches give protection against skidding.

Blowout Protection—Nine extra pounds of rubber are added to every 100 pounds of cord by the Firestone Patented Gum-Dipping process. Every fiber of every cord in every ply is saturated with liquid rubber which counteracts internal friction and heat that ordinarily cause blowouts.

Puncture Protection—Firestone's patented construction of two extra layers of Gum-Dipped cords under the tread protects against punctures.

New Low Prices—Never before have all these safety and economy features been combined in a tire priced so low.

Don't take chances on your holiday trip. Come in today. Let us put a set of these large size, rugged, long wearing tires on your car—remember, you save 25%.

Listen to . . .

THE FIRESTONE VOICE OF THE FARM—Interviews with the Champion Farmers of America, featuring Everett Mitchell. Twice weekly during the noon hour. Consult your local paper for the station, day, and time of broadcast.

THE VOICE OF FIRESTONE featuring Richard Crooks and Margaret Speaks and the 70-piece Firestone Symphony Orchestra, under the direction of Alfred Wallenstein, Monday evenings over the Nationwide N. B. C. Red Network.

Right by Existence

The equal right of all men to the use of land is as clear as their equal right to breathe the air—it is a right proclaimed by the fact of their existence.—Henry George.

GARFIELD TEA

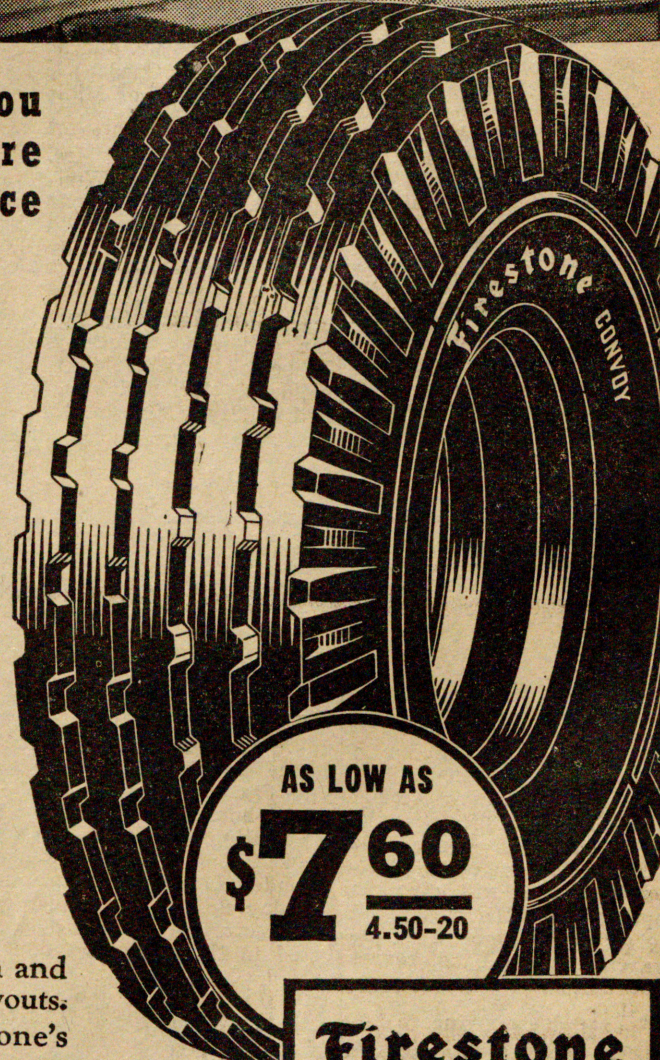

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste

Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-wide distress. Burning, scanty or too frequent urination may be a warning of some kidney or bladder disturbance. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel weak, nervous, all played out.

In such cases it is better to rely on a medicine that has won country-wide acclaim than on something less favorably known. Use Doan's Pills. A multitude of grateful people recommend Doan's. Ask your neighbor!

JUNE BRIDE'S TROUSSEAU

Photo-Feature

Her wedding gown might be of gleaming silk satin, the color of her heirloom lace veil. The gown is corded at the neck and shoulder lines, and her headdress is made without cutting the lace.

She'll find a hint of summer in this gaily printed cotton pique in red and blue on a background of white, combined with deep blue silk sheer. The hat, gloves and bag are of the same pique.

She'll be flattered by the style and color of this one-piece frock, a real accomplishment for the knitter. It is made with a flare to the skirt, and is of a new type of yarn combining rayon and linen that comes in soft "dusty" shades.

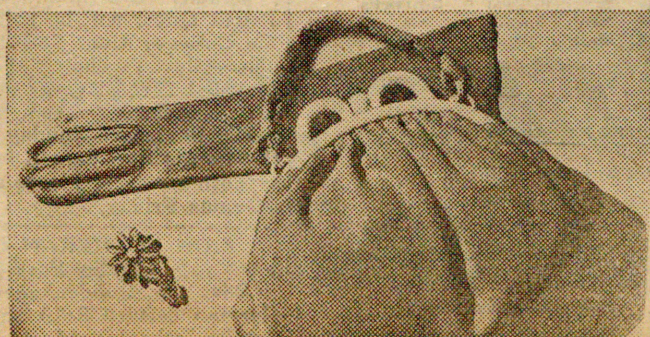

The "picture hat" of 1938 has a flat-topping draped veil of black. It's an off-the-face affair of conch-shell pink straw. Black silk belting ribbon is the trimming.

Accessories...

from Merchandise Mart, Chicago

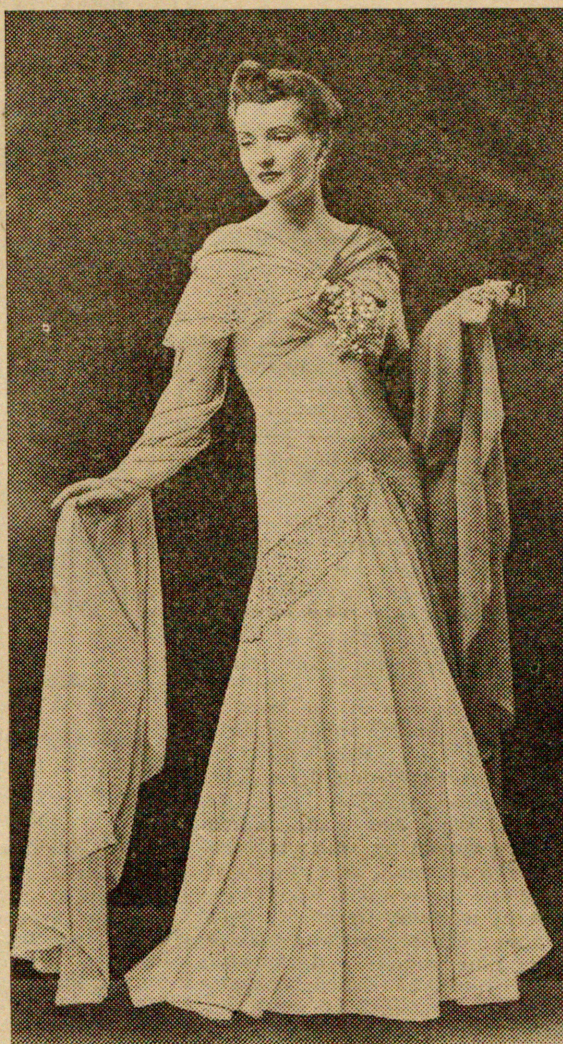

Here are afternoon gloves of doeskin in powder blue, with tiny beads embroidered into a design. The dusty pink bag is a rough crash, and the rose quartz clip is a flower pattern, pinned to her dress.

For sports, a scarf in multi-colored stripes is an accent for any costume, matching in color the peaked "Sonja Henie" bag in soft linen.

For traveling she may wear this beautiful ensemble of grege imported woolen which has a bodice in matching silk crepe. Olive green crepe lines the coat and sash, and trims the hat and bag.

For evening wear she might choose this lovely gown of white mousseline de soie. Floating scarfs in two shades of green silk chiffon form a graceful drape or a long cape. Crystal beaded eyelet embroidery is used for the drop shoulder effect and is repeated in the skirt.

BOOKS IN BRIEF

How Prisoner Used Rats to Cheat Death

By ELIZABETH C. JAMES

THE prisoner opened his eyes to blackness. Fears shook him as he thought of the Inquisition Judges. Feeling painfully about him he discovered that his clothes had been changed while he was unconscious and he now wore an unfamiliar robe. Thus does Edgar Allen Poe set the stage in "The Pit and the Pendulum."

What manner of place was this? Perhaps he was dead and this was eternity. Perhaps he was entombed alive. Panic seized him. He must know the size and shape of his prison! Cautiously he felt his way until he found the wall. Ripping a piece from his robe to mark the starting place, he began to creep along, counting the paces. A circuit of 50 yards indicated that it could not be a tomb. Now he would cross the cell. Boldly he started away from the wall, but his feet tripped in the robe and he fell prone.

Taut he lay. A queer sensation stole over him, for his head seemed to be touching nothing, to be in space. Reaching out he found a well or pit. Pit! Almost swooning he recalled stories of the Inquisition pits which the people in Toledo had lately heard.

Some time later and with an effort, his benumbed mind saw that the prison was now lighted. He saw

Elizabeth James

TURBULENT LIFE

The life of Poe is more turbulent than any story that he wrote. Scores of biographers have attempted to reveal something of the spirit of this lonely and passionate man. Although Poe died in his fortieth year, he left literary criticism that is excellent, and short stories and poems that are unexcelled for sheer artistry.

Later biographers have stated that Poe's reputation was worse than Poe. His difficulties at the University of Virginia and at West Point, and his being disinherited by his foster father gave him a name for recklessness when he was very young which the events of his later life did nothing to offset.

Poe lived from 1809 until 1849, attaining a literary fame in Europe as well as in America.

walls of metal, a stone floor, and a high ceiling. In the middle of the floor yawned the pit. How strange he felt—he could not move. Lying on his back he was bound to a wooden bench.

Pendulum Appears.

From the pit crept rats. The prisoner looked about him for some weapon. Only his arm was free from the elbow down, so that he could reach the plate of food on the floor. As the rats crept toward the plate he waved them away.

Again a noise, this one sounded like steam. Looking upward, he saw the silver object to be a pendulum that dropped slowly with each stroke. Then he divined the cunning of his captors. A blade of steel was descending slowly toward him. With days of mental torture and hours of physical torture, his death would be slow and horrible.

Time passed but he could not reckon how much. His mind alternated between fascination and insanity. Sometimes he laughed. Sometimes he cried. Sometimes he shrieked.

Now the blade was only a yard above him, then two feet above. Then one foot.

Rats Save Life.

Only inches separated them. Then desire for life surged through him so that he cried to heaven for help. Grasping the scraps of food he smeared the meat over his bonds as far as he could reach, using every drop of grease. Then he lay still. The rats had not before seen him lying so. They watched, crept closer, then jumped onto the bench. They were over his body in a flash. Voraciously they gnawed and chewed the bands of cloth. Greedily they tore it, trying to get the last drop of food.

The pendulum swung in long arcs, even closer. There was a pressure as the knife cut his robe. He did not dare move yet. Seconds passed, and he knew that his robe was cut through. As the blade reached the height of its arc, he lunged with all his force and fell free.

The pendulum stopped and swiftly rose to the ceiling. The prisoner lay as one lifeless, waiting for the next mode of death.

He did not wait long. The walls changed color, revealing hideous pictures which might have come from hell. Oppressive heat choked him as he saw that the walls were being heated and were coming together so that the cell was growing smaller. Their purpose was clear: to push him into the pit.

A crash sounded. The walls jerked away as with thunder. An arm clutched him. The French had conquered his enemies. He was saved.

FREEDOM OF SPEECH

"Freedom of the press may protect criticism and agitation for modification or repeal of laws, but it does not extend to protection of him who counsels and encourages the violation of the law as it exists. The Constitution was adopted to preserve our government, not to serve as a protecting screen for those who, while claiming its privileges, seek to destroy it."—Supreme Court of the United States, in *Milwaukee Publishing Company v. Burleson*, 225 U.S. 407.

Belfast Castle
Belfast castle, a mansion built by the third marquis of Donegal about a century ago, with 200 acres of grounds, now belongs to the public, having been presented to the citizens of Belfast by its owner, the earl of Shaftesbury, a former lord mayor. The castle stands on the slopes of Cave hill, from which there are splendid views of the city and Belfast lough.

TINLEY PARK

Melvin C. Keup has returned from a visit with his parents, Mr. and Mrs. G. H. Keup of Andover, S. Dakota, who accompanied him home to spend a short visit here.

Robert Hartley of the South subdivision left last Friday afternoon for Edgerton, Kansas to rejoin his wife and family.

Mrs. Omar Ebenhack attended a Ladies Aid meeting Wednesday of the Worth Methodist church held in the parsonage.

Tinley Park Woman's Club

The Tinley Park Woman's Club held their Spring Luncheon last Thursday May 18 in Mickelberry's Inn at 95th and Western avenue.

The picturesque Lincoln Room, where the luncheon was served, was made especially attractive by bouquets of various colored irises, beautifully arranged and placed on the tables. Dainty hand made favors of miniature irises and jonquil graced the individual places and created the atmosphere of an early spring garden.

Luncheon over, the out-going president, Mrs. Omar Ebenhack, presided graciously during the afternoon, introducing the new president, Mrs. W. W. Kester, who was given a genuine welcome, and presenting the guests who were: Mrs. Swett, third district president; Mrs. Combs, organizer of the club and Mrs. D. Voludman, pianist. Mrs. Ebenhack also made mention and introduced members who had brought recognition to the club in the various departments of work.

Mrs. Chas. Crist, program chairman presented Mrs. Ebenhack with a token of appreciation in the form of a gift, from the club, for her past services.

The balance of the afternoon was fully enjoyed listening to the exquisite music that was so well rendered by Mrs. Voludman, and the reading of interesting original poems by Mrs. W. Mitchell.

Mrs. Albert Koehler dean, and her co-workers who arranged, for this luncheon, are to be greatly congratulated. Thus closed another impressive year for the Tinley Park Woman's club.

Mr. and Mrs. C. Andres, Mrs. Elizabeth Harding of Tinley Park and Mrs. Schuman of Blue Island left last Sun. night for Overton, Neb. where they attended the golden wedding of Mr. and Mrs. Aug. Goebel celebrated Tuesday of this week. Mr. Goebel is a brother of Carl Goebel of Tinley Park.

Mrs. Elmer Stelter entertained at dinner Sunday the following guests: Mr. and Mrs. Schmidt and family, Mr. and Mrs. Aug. Branstadt of Homewood and Mr. and Mrs. Pete Koehler of Blue Island.

Mr. and Mrs. Frank Schmutte had as guests Sunday, Mr. and Mrs. Joe Hirdzer of Chicago.

A new plank crossing has been completed in front of the Rock Island depot which is a decided improvement.

V. H. Scheer who has been in ill health for sometime remains about the same.

The Tinley Park public school held their commencement exercises Thursday evening.

The Village Board held a lengthy session Monday evening. The revision of the water ordinances and the local sewerage proposition claimed the board's attention the major part of the meeting.

The general stores and markets will close at 10 a. m. Monday morning in observance of Memorial Day.

Mrs. Roy C. Hannun entertained at a most delightful luncheon in her home Monday afternoon, four Mokena Woman Club members, namely, Mesdames, L. G. Bruder, Rene Guindon, Robt. Bechstein and Wm. Semmler. A most pleasant afternoon was spent in this lovely home.

The R. N. A. held their Memorial services at their meeting Tuesday.

District Deputy Marjorie Gordon was present and spoke of the Juvenile Essay contest which is open to all RNA juveniles. For full particulars on this subject, see Mrs. Klepper who has leaflets on same. Mrs. Ruth Freitag sang, "Heaven is My Home", during the Memorial service and was received with much heartfelt gratitude.

The next meeting will be June 7. A group of young people assisted Miss Ellmore Keuch to celebrate her 17th birthday in her home last Wednesday evening, May 18. Bunco was played and other games and a good time was enjoyed by all. Refreshments were served. Miss Keuch received many lovely gifts. Those presents were: Richard, Gerhard, Emma and Helen Bean and Donald Ouwenga from Blue Island and Dorothy Manzke, Herbert Keuch, Loretta Hick, Arthur Keuch, Hilda and Laura Wille, Erwin, John, Marie, Pearl and Dorothy Wille, Florence, Walter, Wm., and Marian Keuch and Fred Mayer.

TINLEY LOOSES CLOSE OPENER TO MOKENA 4 TO 2.

The Tinley Park baseball team lost their opening game of the season to Mokena by a close 4 to 2 score at the Tinley diamond last Sunday.

Starter of 500-Mile Race Sees More Flag Waving Needed Now

Starter Klein gives one of the racers the checkered flag in qualifying for 500-mile race.

INDIANAPOLIS, Ind.—The man who waves the flags for the 500-mile race believes his hands will be busier than ever this Decoration Day.

Seth Klein is closer to the race cars than any official at the Indianapolis Motor Speedway. Watch him lean far over his platform 26 feet above the track, directly at the starting line. His flags nearly brush the top of the driver's head, yet Klein has the knack of fluttering the banners so they can't be missed by the driver and yet don't distract his attention from the track, or impede his view.

Klein has been the official starter

at Indianapolis for the past 19 races. "The return to one-man cars," he points out, "will mean the drivers will have to receive more warning flags than ever before. The mirrors on the cars will help some, but a driver will know it's official that a car is attempting to pass him when he gets a vivid blue flag. Black means to stop for consultation at the pits. Yellow, drive with caution; white, starting your last lap, and the checkered flag, you are finished."

Klein officiates also at the qualifying speed trials, when he steps out on the track, not more than four feet from the driver and gives him the various flags.

Base on balls, Boerner 4, Tierney 5. Hit by pitch, Tierney 3. L. Nugent, Rick, Rinsink. Left on base, Tinley 13—Mokena 9.

Mass at 8:00 a. m. each Sunday of the month except the first Sunday, when mass will be at 10:00 a. m.

CHRISTIAN SCIENCE CHURCHES
"Soul and Body" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, May 22.

The Golden Text was, "Why art thou cast down, O my soul? and why art thou disquieted within me? hope thou in God: for I shall yet praise him, who is the health of my countenance, and my God" (Psalms 42:11).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "As for me, I will behold thy face in righteousness: I shall be satisfied, when I awake, with thy likeness" (Psalms 17:15).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Soul and Spirit being one, God and Soul are one, and this one never included in a limited mind or a limited body" (p. 335).

In King's Drawing Room
During the reign of terror in France in the early 1790s the prisons of Paris presented a scene seldom witnessed in history. In the evening the aristocrats of both sexes assembled in the common jail room—always called by them the drawing room—powdered and elegantly dressed; saluted one another by their former noble names, played cards and chess just as though they were assembled in the king's palace.

FRANKFORT

Mrs. Herbert Kohlhaugen

Mr. John Staff who was ill all last week is able to be out again.

Prof. Alvin Hill was called to the home of his mother, in southern Illinois, last Friday, because of the illness of his mother.

The Bachelor Button club attended a show in Joliet last Tuesday.

Rooms 1, 2 and part of 3, of the Frankfort public school presented a playlet, "Just Plain Dot" and an operetta, "On Midsummer's Day" in the school last Friday. The audi-

ence enjoyed it greatly.

A son was born last week to Mr. and Mrs. Osmer Knickrehm of Peotone. He will be a playmate to Carol Jean and Dolores. Mrs. Knickrehm was the former Miss Pearl Heisner of Frankfort.

Mrs. Walter Pfaff entertained the Home Improvement Club in her home last Thursday. Mrs. Alfred Zechlin, program chairman presented the following: "Fool-proofing America", Mrs. Pfaff; "Dr. Carter", Mrs. Fred Heusner; "The Pringles Go Red", Mrs. Geo. Heisner; "How Musical Are You?", Mrs. Frank Kohlhaugen; "Speech Is Golden", Mrs.

Geo. Andrews; "What Price Neglect", Mrs. Fred Warning; "Good Medical Service", Mrs. John Clark; "Have You Paid Your Doctor?", Mrs. Wm. Eisenbrandt; "When You Buy Sheets", Mrs. Blanche Mitchell.

Election of officers was held, resulting as follows: President, Mrs. Ed. Vollrath; Vice president, Mrs. Blanche Mitchell; Secretary, Mrs. Frank Kohlhaugen and Treasurer, Mrs. W. V. Hedges. The next meeting will be held in the home of Mrs. Alfred Zechlin with Mrs. Hedges as program chairman.

The out-door movie sponsored by the business people last Saturday night, was well attended and much enjoyed. They will give another one this Saturday night May 28.

The 4-H Happy Hustlers met with Miss Shirley Haake last Friday. After the business session, refreshments were served.

The Merry Maids 4-H club met with Miss Marietta Christiansen last Saturday. Dresses and slips were cut. A social time was enjoyed and games were played followed by refreshments.

Frederick Knater, son of Mr. and Mrs. Henry Knater underwent an operation for appendicitis last week. Frederick is attending the Peotone high school.

Mr. and Mrs. Emil Lenhardt and son Harold of Chicago Heights, Miss Loretta and Margaret Sangmeister, Mrs. Louis Steinhagen of Frankfort attended the style show given by the Sewing Dept., of the Peotone High School in Peotone last Friday evening. Marietta Christiansen, Lilah Fredericks and Irene Steinhagen were some of the students who displayed their work.

News From Springfield

By Bernice T. Van der Vries, Representative 7th District, General Assembly of Illinois.

Promptly at eight o'clock on Friday night, the Speaker of the House, Louie E. Lewis, vigorously rapped his gavel on his desk and the Special Session of the General Assembly was convened so far as the House was concerned. It has been said that Mr. Lewis' penchant for promptness is a hangover from the school teaching of his early days.

The opening of the Session was preceded by an hour of handshaking among the members and those who are accustomed to attend the sessions in the interests of various organizations. The House Chamber took on the appearance of a home coming celebration for this was the first meeting since July 1, 1937.

Questions referring to the Primary election were numerous such as "How did you come through?" or "Have you a contest in November?" or "You're safe aren't you?" These were of course addressed to the successful members. On the other hand more of the defeated members were present than was anticipated. While this may not seem to have any bearing upon the work of the legislature to the casual observer or to those acquainted with legislative procedure, it does give evidence to the fact that this is a "lame duck" session and that it may be difficult to hold in attendance those who no longer have the interest in the work which those have who expect to return.

There was considerable discussion among the members of the heavy assignment of work which was laid out by the Governor in his message to the Assembly. The Governor read his message at a joint session of the Assembly after the House and the Senate had each gone through the formalities of organization.

Practically every controversial measure which failed to pass in the last regular session with the addition of several new ones were included in the Call. Minority Leader Schnackenberg stated on the floor that "everything controversial except parole was in the Call."

Immediately after the Governor's message which urged relief appropriations' drivers' license, a state school board, housing measures and city manager government, bills were introduced covering most of the subjects. The bills had been prepared and assigned in advance in most cases to the members of the majority party favorable to the administration.

The first dissension in the new session occurred when Floor Leader Adamowski moved that the rules be suspended and all bills advanced to second reading, his plan being to have all bills considered on second reading by the House sitting as a committee of the whole, rather than by the committees which functioned during the regular session. There was an immediate protest by the minority and by a number of the members of the majority and on a roll call the protest was sustained. All bills except relief appropriation bills were sent to the Speakers table to be allocated by him to appropriate committees.

Numerous expressions of regret were heard because the Governor had tied up a recommendation for an appropriation of \$1,000,000 for

distressed high schools with the establishment of a State School Board. While all admitted the need of the high schools because they do not at the present time receive state aid, yet there are many who feel that the State School Board should be an advisory and not an administrative board. They feel also that to give a newly created board for its first business, the distribution of \$1,000,000 would be a dangerous procedure.

Time alone will tell how important a session this one will be. There are some who predict that about all that it will accomplish will be the appropriation of funds for relief.

Historical Myth Is Exploded

"If there is any mystery associated with the death of John Wilkes Booth, it relates to the strange methods which intelligent men have pursued to perpetuate the myth that Abraham Lincoln's assassin was never apprehended." This statement was made recently by Dr. Louis A. Warren, director of The Lincoln National Life Foundation, in recalling the facts surrounding the death of Lincoln seventy-three years ago on April 15th.

"Few murderers carried in their pockets and on their bodies more marks of absolute identification than did Booth," said Dr. Warren. "A pin removed from his shirt when it was unbuttoned to allow him to breathe more freely after he was shot bore this inscription, 'Dan Bryant to J. W. Booth.' A diary was also taken from his pockets in which he had written in his own hand, episodes of his escape. A check made out to John Wilkes Booth was also in his purse.

"Upon the return of the body to Washington, an autopsy was made and a coroner's inquest held. The clerk at the Washington Hotel where Booth usually stayed positively identified him by the initials 'J. W. B.' tattooed in India ink on the right hand between the thumb and forefinger. A physician who had treated Booth for a small tumor on his neck identified him by the peculiar scar that it had left. A dentist also identified two fillings he had made for Booth.

"Several persons who knew the assassin personally agreed without a moment's hesitation that the body was that of the actor, John Wilkes Booth. With the initial pin, the diary, and check in his name, supplemented by the initials on his hand, the scar on his neck, and the fillings in his teeth, it is possible to conceive of a more dependable and irrefutable identification?"

—From The Lincoln National Life Foundation, Fort Wayne, Indiana.

PALOS PARK

Miss Dorothy Marie Collines daughter of Mr. and Mrs. Joel Collins of Palos Dells and Mr. Gerald P. McNamara, of 7742 Ada street, Chicago, were united in marriage in the Palos Park Sacred Heart Catholic church Saturday morning May 14.

Mrs. Ben Hyink sang, "Oh Promise Me" accompanied on the piano by Mrs. Frank Itzel.

Following the services a wedding breakfast was served in the Wedgewood hotel followed by a reception in the Collins home attended by 150 friends and relatives. Mr. and Mrs. McMamara are enjoying a honeymoon at Turkey Run and upon their return will make their home at 111 street and South Park.

The Palos Juniors will meet in the home of their president, Miss Betty Jane Litz June 10. Ethyl Pronger, sponsor will celebrate a birthday at this meeting and Jane Muhlhausen will be initiated into the club. On June 4, the club will attend the WLS barn dance.

Mrs. Robert Harkness entertained her bridge club last Tuesday.

Miss C. McGrath of Chicago spent several days in the Robt. Harkness home recently.

Willie Mae Grunnell of Atlanta, Georgia spent two weeks in the Joel Collins home.

Clara Dzurney underwent an operation for appendicitis in the Englewood hospital recently and returned to her home last Sunday.

Mr. Richard Kriz has recovered from an illness last week.

Shiela Teurtelot celebrated her 14 birthday last Thursday. Lois Wells

was a week end guest in the Tourtelot home.

Mr. and Mrs. Lauderback have moved in the house on 121st St. and 86th avenue, formerly occupied by the Ott family.

Mr. and Mrs. R. Russell have moved into the log cabin on 121st and 87th avenue.

Mrs. Lewis Barker was a luncheon guest in the home of Mrs. R. Russell last Wednesday.

Mr. and Mrs. Claude Adamson and sons of LaPorte, Ind., were guests in the Stockdale home last Sunday.

MARLEY

MISS FRANCIS GILLETTE

Mr. and Mrs. Pete Stephens and daughter Charlotte of Washington Heights were visitors Sunday afternoon in the Alfred Sproat home.

Mr. and Mrs. Ray Munch of Harvey visited last Wednesday in the Mervin Moore home.

Mrs. Jane Casson spent the week-end in Joliet in the Michael Vavorek home.

District 13 of the Pure Milk Association sponsored a dance in the Colonial hall last Friday night. A large crowd attended.

Mrs. Ruth Morrison and son Billy of Lockport spent the week-end in the Fred Blodgett home.

Mr. and Mrs. Jesse Marshall and Mr. and Mrs. A. J. Cleveland visited Sunday in Lemont at the Martin Bettenhausen home.

Last Sunday, H. H. Sabin, Miss Eleanor Sabin and Francis Nelson motored to Champaign to visit Homer Sabin who is attending school there.

Mr. and Mrs. William Moore of

New Lenox visited Sunday with Mr. and Mrs. Mervin Moore.

On Monday evening May 30 the Maple street Arbor of Gleaners will sponsor a dance in the Colonial Ball Room, New Lenox. The music will be by Lee's Melody Boys.

Last Sunday evening the following officers were elected for the Sunday Evening Club for the next four months: Edward Stevens, President; Jean Frazer, Vice-President; and Helen Tilsy, Secretary and treasurer. There will be no evening services at the church next Sunday because the group is planning to go to the Baccalaureate services at the Joliet High School Auditorium.

Wilson Gillette left last Sunday for Corinne, Utah where he will visit his aunt, Mrs. William B. Holmes.

The Cloddy
Soil of 1938

(Concluded from last week.)

Another phase or feature of soil particle dispersion is that when the dispersed soil is wet and then loses the water film, the highly dispersed particles become inter-locked and this constitutes the caking which on further drying makes the hard packed cloddy condition.

During recent drouth years considerable lime has risen to the soil surface through upward movement of soil capillary water. Considerable of this lime, or calcium and magnesium, displaced soil particle hydrogen, restored electrolytic balance and made the surface soil more or less friable. But such lime or calcium thus brought to and becoming a part of the surface soil particles is itself leached out easily by snow water, or by continuous spring rains as occurred in the spring of 1933. Consequently, we have the greatest danger of calcium loss leaching and soil dispersion following drouth years.

When the soil particles are dispersed, trying to get away from each other through repulsion, they erode most readily either through wind or water erosion. In the west the high alkalinity drings about dispersion that subjects the soil to the erosion of dust storms, and in our humid territory the dispersion of the high acidic condition subjects it to the destructive losses of water erosion. Many of us welcomed the recent snow as a source of subsoil moisture, not realizing that very little of it sunk into the soil but that it carried an acid charge that would damage our soil following its run-off which would steal the calcium and other basic minerals of the soil. It thus left our soils tough and hard to till, and particularly short of calcium.

Much of the nitrates of our soils, recently acquired through the upward movement of soil capillary moisture, and which nitrates were in the form of calcium nitrates, were also lost in this soil water and the apparent evidence of which is now noted in the shortness of the spears of grass, and this loss of calcium nitrates will be reflected in crop growth.

Some may ask how will this dispersed condition affect crop growth more difficult for root penetration, less carryover of available plant food from previous year, and less water supply. And this brings up the realization of the advantage of those hybrid strains of corn that have a greater and deeper root penetrating power, which will be needed not only to go lower for water but lower and wider for plant food. Hybrid

corn of the right strains has a soil setting in this Will County region that will make it show the stuff it is made of or disclose its shortcomings in comparison with the better hybrid strains. With the present shortage of water hay crops will likely be light in this district, and the importance of silage where it constitutes a good part of the dairy ration, makes it important that growers of silo corn also use the very best strains of hybrid seed corn they can get to meet 1938 soil, crop and economic conditions. Those who from mere loyalty or sentiment of attachment to old strains of open pollinated, or from the mistaken notion that seed corn for silo corn carries less importance than seed for crib corn will all realize this coming fall the mistake of their judgement, whether based on sentiment or lack of understanding. A hybrid strain that will remain green through drouth, make big ears and hold its leaves after fall frosts similar to the 366 that was grown a long Lincoln Highway last year would best meet the 1938 silo corn situation in this April snow leached territory.

HOMER

Memorial Day services will be observed at the Homer church next Sunday, May 29th at 2 p. m. Rev. Snodgrass of Marley will be the speaker. Several other numbers have also been arranged. The committee in charge is Mr. Frank Savage, Mr. and Mrs. Harper Reid, and Mr. and Mrs. George Milton.

A good program has been arranged for Decoration day at 2 p. m. at the Brooks cemetery. Rev. Wolsted of Lockport will be the speaker. The committee in charge is Mr. and Mrs. Ross White, Mr. and Mrs. Russell Myrick, and Mr. and Mrs. Myrick, and Mr. and Mrs. Adam Bodenschatz of Lemont.

Little Elaine Ott is seriously ill at the Silver Cross hospital in Joliet.

Thomas Stout of Peoria is spending a week's vacation with his mother, Mrs. Myrtle Stout at the H. Burch home.

A family reunion was held at the home of Mr. Ebb. Carroll, Sunday. Those present were Mr. and Mrs. Frank Carroll and family, Mr. and Mrs. Charles Seivert, Mr. and Mrs. Glenn Carroll of Kansas, Mr. and Mrs. George Carroll and family of Chicago, Mr. and Mrs. Clarence Wies, Mr. and Mrs. Martin Jungles and family. In the evening the family met again in the home of Mr. and Mrs. Martin Jungles. Mr. and Mrs. Glenn Carroll left Monday for their home in Kansas.

Thursday, Mrs. Marie Ott and Mrs. Burch, teacher and superintendent

of the Lockport grade school took the pupils of the eighth grade to Chicago to visit at Field's museum, the planetarium and the airport. Mrs. Ott's son, Edward, also went as a guest of Mrs. Busch.

Mr. and Mrs. Glenn Carroll of Kansas arrived in this vicinity Friday to attend the funeral services of their uncle, Mr. M. Weber, in Lemont.

On Sunday, May 5, the infant daughter of Mr. and Mrs. Clarence Wies was christened at St. Michael's church in Orland. The name given the baby was Kathryn Rosalie, after both of her grandmothers. Mr. and Mrs. Lawrence Welter of Lockport acted as sponsors. Dinner guests at the home of Mr. and Mrs. Wies were Mr. and Mrs. Lawrence Welter, Mr. and Mrs. Peter Wies and Mr. Ebb. Carroll. Mr. and Mrs. Martin Jungles and daughter, Jean Marie, were also guests in the afternoon.

Mr. and Mrs. Harry Hull of Chicago Heights and Mr. and Mrs. Wilbur Francis of Manhattan, were dinner guests Sunday in the home of their parents, Mr. and Mrs. James Frazer.

Mr. and Mrs. Owen Ott of Lockport, were entertained at the Geo. Ott home Sunday.

The Royal Neighbors met in the M. W. A. hall, Thursday afternoon. During the business session, the committee in charge last year was asked to place plants on the graves in the various cemeteries of the deceased members. A social hour followed, with Mrs. Kathryn Wies and Mrs. Susan Wagner in charge. Bunco was played and prizes awarded to Mesdames N. L. Welter, Will Lester, Peter Wies, Raymond Lester John Welter, Jerry Parker and John Donahue. Mrs. George White and Mrs. Harry Reed will have charge of the social hour in June.

Due to the WLS barn dance, the May party of the Community club has been postponed until the last Friday in June.

The Ladies' Missionary Society will hold its regular meeting in the church parlors Thursday with Mrs. Ben Ingerol and Mrs. Grace Piggott as co-hostess.

Mrs. Grace Piggott had as her guests Monday, Mrs. Bolat of Midlothian and Mr. and Mrs. H. Peterson of Chicago.

Earl Cutler, who was employed at Detroit, Michigan, was stricken with appendicitis Sunday; he was rushed by airplane to Chicago where his father and uncle met him and took him to Silver Cross hospital in Joliet for the operation. Earl is much improved at this writing and expects to be home in a few days.

Mrs. Frank Wylegoose underwent a minor operation at Silver Cross hospital Tuesday.

Mr. and Mrs. Merritt Cagwin and sons, Willard and Ralph, were entertained at the home of Mr. and Mrs. John Guildenzoph of New Lenox, Sunday in honor of the latter's son John's birthday anniversary.

Mr. and Mrs. Elmer Rowley and daughters Joan and Jean of Chicago Heights spent Sunday at the C. G. Rowley home.

Mrs. Raymond Lister and Mrs. John Homerding entertained at a miscellaneous shower Wednesday afternoon in honor of Miss Veryl Lester, who is become the bride of Eugene Grace of Palos on May 28. Miss Lester received a fine number of gifts. Bunco was played and prizes awarded to Mrs. Bracken, Mrs. Wm. Bengston and Mrs. John Donahue. Duplicate prizes were presented to the bride-elect.

Bathing on Coral Beaches

Bathing on the coral beaches of the island of Jamaica can be enjoyed at all times of the day and night, because there is practically no tidal flow.

The Need for Unity

By RAYMOND PITCAIRN

National Chairman
Sentinels of the Republic

In America we observe many anniversaries, commemorating important dates in our history. Many others we forget. Among the latter is included May 14. Yet that day is well worth recalling. It was the date set early in the year 1787 for the opening of the Convention that wrote our Federal Constitution.

Although the difficulties of travel at that period so delayed many delegates that the formal opening had to be postponed until May 25, Washington and others met at Independence Hall on that day prepared to take the important steps that would unite a disorganized people.

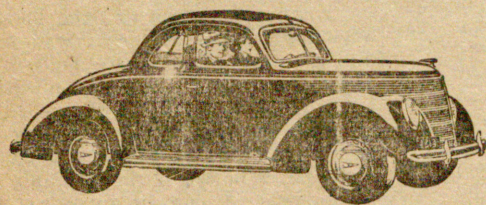

In their great objective lies the significance of those dates. For out of the Convention then assembled evolved a plan and a spirit of national unity and cooperation which has made the United States one of the greatest nations on earth.

As with all historic anniversaries, there lies in this a lesson and inspiration to our nation. In that convention long enemies were still by a readiness to see opponents' points of view, and by a willingness to subordinate certain sectional or group demands to the welfare of the nation as a whole.

Here is an example which America might follow with benefit today. As this is written there are evidences that such thoughts are in the minds of many of our people. At recent meetings, employer and employee groups have spoken of fuller cooperation. At Washington, various leaders have shown renewed intention to help the nation through the difficulties which now beset it, and to discourage group conflict.

All this is encouraging. America will hope it continues. For what America needs today is a renewed spirit of the teamwork which built a great nation out of thirteen struggling states and made that nation the symbol of liberty, for opportunity and for progress now known over all the world.

In unity and mutual understanding still lies our strength.

FOUR FORMER WINNERS AT INDIANAPOLIS
RATED HIGHLY TO REPEAT IN BIG RACE

INDIANAPOLIS, Ind.—Four old standbys will make the crowd sit up and take notice in the 500-mile race May 30th at the Indianapolis Motor Speedway.

They are all former winners of the big race, one is the present AAA champion and the other three have held the National championship. Their names are: Wilbur Shaw, Louis Meyer, Kelly Petillo and Wild Bill Cummings.

Shaw is an Indianapolis boy, and has the dazzling 1937 victory to his credit. He probably will go into the race as a prime favorite to repeat, a feat which never has been performed at Indianapolis.

Meyer hails from California and is the miracle man of 500-mile racing. The checkered flag saved for him in 1928, 1933 and 1936, and he finished fourth last Decoration Day.

Petillo's sobriquet is "King of the Ridge" and he also comes from sunny California. He beat Shaw to the wire in 1935 and scored a sensational triumph.

Wild Bill Cummings is a Hoosier hero, and won the big race in 1934. He was third in 1935, left at the post in 1936 when his clutch froze and sixth last year. Cummings held the pole, honor position of the race in 1937, gaining that place by turn-

ing in the top qualifying time on the first day of the speed trials.

All four of these drivers are "hot" chauffeurs and arch rivals on the Speedway. Their rivalry is bound to make itself felt for they are all equally anxious to add another triumph to their records.

Shaw and Meyer probably will be slightly favored over Cummings and Petillo by the big crowd Race Day, but Wild Bill and Kelly are far from dark horses.

With fast cars, there's little to choose between them if you're looking for a likely candidate for top honors.

Corn Growers In Every
Township In Will Co.

will have the opportunity this season of noting the difference between hybrid seed corn produced particularly for high viability and vitality, as distinguished from the merchandising aim of quantity contract production.

THOMSON TOP YIELD SEED is the only hybrid seed corn adapted to Will County conditions you can buy where the one you buy from, and upon whose guarantees you depend, gave his personal supervision to the production and preparation of the seed, as distinguished from quantity contract production.

Seed quality, as distinguished from quantity, is the one aim of Thomson's Hybrid seed fields. Seed quality of the highest degree will be needed to meet 1938 climate and soil corn growing conditions. Get Thomson's Top-Yield low priced size seed for your silo acreage.

I, JOHN A. LUHRING, Treasurer of the Village of Frankfort, Illinois do solemnly swear, or affirm, that the foregoing statement is correct and true to the best of my knowledge and belief.

Dated this 25th day of May, 1938.
J. A. LUHRING,
Treasurer of Frankfort.
Subscribed and sworn to before me this 25th day of May, A. D. 1938.
Bernice Weichbrodt, Notary Public.

NEW LENOX

Dolores Walsh

Mr. and Mrs. Harold Deitz of Chicago spent the week end in the Jack Minicus home.

Mr. and Mrs. John Cruise Jr., and son spent the week end in the Fred Walters home in Chicago.

Mrs. James Tauber entertained the Afternoon Pinochle club at one o'clock luncheon, Thursday in her home. Prizes in the game were awarded to Mrs. Henry Krohn, Mrs. Harry Fitzer and Mrs. Chas. Reeser.

Mr. Joseph Walsh has returned to his work following a week's illness.

Mr. and Mrs. Hilbert Strassenberg and family of Momence, Miss Elizabeth Youker of Tinley Park and Harold Warning of Mokena were dinner guests Sunday in the Chas. Reeser home.

Mrs. Arvid Swanson underwent a major operation in Silver Cross hospital last Wednesday.

Jack Lannen Sr., underwent a major operation in Billings Memorial hospital last Saturday.

Mr. and Mrs. LeRoy Ereen and family, Marie Bradley and Willis Seybold of North Chicago; Mrs. P. Draper and daughter of Waukegan.

Mrs. H. Danforth of Chicago, Mr. and Mrs. Fred Wood and family, Mrs. Helen Gillette and family of Joliet were week end guests in the Wm. Wood home.

Mr. and Mrs. Thomas Carey were surprised at a party Sunday in the home of their daughter, Mrs. Russell Mangun and husband, celebrating their 28th wedding anniversary and Mrs. Mangun's birthday. Supper was served to 35 guests at 6:30 at one long table which was covered with a lace cloth and centered with a large bouquet of flowers. Assisting Mrs. Mangun in serving were, Lillian Carey and Francis McGann. Cards were played. Mr. and Mrs. Carey received many lovely gifts. Those present were: Mr. and Mrs. Chas. Freed, Mr. and Mrs. Chas. O'Connor of Chicago; Mr. and Mrs. John Long and family of Symerton; Mr. and Mrs. Orrin Thorn and family of Downers Grove; Mr. and Mrs. F. McGann and daughter of Joliet; Chas. Johnson and family of Manhattan; Mrs. A. Doyle; Evelyn Osmus, Marie and Jimmie Burns of New Lenox.

Mrs. Russel Bettenhausen, the former Ruth Wood, was honored at a personal shower by Miss Helen Gott in the Wood home Wednesday.

Bunco was played and prizes were awarded to Mrs. Ben Bettenhausen and Mrs. Wm. Wood who also presented them to the bride. Luncheon was served. The rooms were decorated in pink and green. Those present

were: Lois Lorenz, Lenna Alexander, Eleanor Lette, and Mesdames: Helen Gillette, Fred Wood, Elmer Smith, Esther Linder, Mansfield Kohl, Ben Bettenhausen, W. Wood.

Mr. and Mrs. Wm. Moore of Creta have moved into their new home on Cedar road.

Mr. and Mrs. Wm. Shaw of Joliet are remodeling the old Urch home which they have purchased from Rose Mueller.

Mr. and Mrs. Crawford Gear and sons of Joliet were guests in the W. Brickler home Sunday.

A daughter was born to Mr. and Mrs. Robt. Delaney of Joliet in St. Joseph's hospital recently.

Geo. Wilson of Louisville, Ky., and Herman Jarvis of Buffalo, N. Y., have returned to their homes after spending several days with Mrs. Mary Bentley and daughter.

One hundred mothers and daughters attended the Mothers and Daughters banquet in the M. E. church last Friday night. The tables were covered with white cloths and centered with spring flowers. The walls of the dining room were decorated with reproductions of art. Mrs. Howard Johnson of Joliet was awarded a gift for being the youngest mother present and a gift also was presented to Mrs. Mary Bentley for the oldest mother present. A program in charge of the Ladies Aid was given. The banquet was served by the men and boys of the church. A most enjoyable evening was had.

Mr. and Mrs. C. O. Smith of Blue Island and Mr. and Mrs. Louis Rohdanz of Gary, Ind., were Sunday guests in the Will Drake home.

Bette McIntyre is spending a few days in Springfield, Ill.

Howard Osmus, Robt. Seivert, Gordon Osmus and Robt. Drake, members of the Joliet High School band, went to Elkhart, Ind., Saturday and Sunday where the band entered a contest.

Mrs. John Warning entertained the B-Square club in her home Wednesday.

Miss Audrey Hoffman entertained at a miscellaneous shower for Miss Lois Lorenz last Sunday. Bunco was played with prizes awarded to Mrs. Arthur Neiland and Mrs. Roy Minger who in turn presented them to the honored guest. Luncheon was served at individual tables, with decorations in blue and white. The guests were: Mesdames, Clarence Hoffman, Roy Minger and Evelyn Krintz and Anna Lasinis of Joliet; Mrs. Minnie Brueggeman, Frankfort; Mrs. Arthur Brueggeman of Michigan City, Ind.; Mrs. A. Nieland, Mrs. A. Minger of Frankfort and the Misses Anna Gable, Emma Geistlinger, Francis Delaney, Velma

Krohn, Ruth Sayers, Marjorie Schmuhl Jean Fitzer, Eliza, Gougar, Eliza Nelson, Mrs. Lorenz and Mrs. Hoffman.

Mrs. Chas. Reece, Mrs. Charles Wood, Mrs. Fred Wood and Mrs. Helen Gillette entertained last Tuesday evening at a miscellaneous shower in honor of Mrs. Russell Bettenhausen, the former Ruth Wood. Bingo was in play and prizes went to Mrs. Mansfield Kohl, Mrs. Ruby Gustafson and Mrs. Fred Wood who in turn presented them to the honored guest. A luncheon was served at individual tables, decorated in pink and green. Mrs. Bettenhausen received many beautiful gifts. Those present were: Miss Helen Gott, and Mesdames Mansfield Kohl, Ruby Gustafson, Chas. Gustafson, Elmer Smith, Verna Hartley, Olive Maxwell, Harry Travey, Esther Linder, William Wood, and Ben Bettenhausen.

Mr. George Woodcock is a medical patient in the Hines Memorial hospital in Chicago.

Mr. and Mrs. Herman Terrace of Chicago have moved into their new home recently purchased from Mr. and Mrs. Earl Roth.

The annual Children's Day program presented by the children of the primary department of the M. E. church will be presented on Sunday, June 12.

ORLAND

The Orland 4-H Club held their regular meeting and soil testing school on May 13 at the home of Chas. Erickson. The Farm Adviser, C. A. Hughes and his assistant, Chas. Glover were present. Roll call was answered by giving the name of a bird. Mr. Hughes gave a talk on the calf and poultry projects. After the meeting Mr. Hughes gave instructions on testing soil. All the members had three or four samples of soil which was tested for acid and phosphate. Refreshments were served by Evelyn and Katherine Erickson and Mrs. Wm. Bernhard.

Albert Ihlenfeld, Reporter

A change has been made in the office of librarian in the local WPA library. Miss Etta M. Schotanus, formerly of Palos is the new librarian.

Announcement has been made of the approaching marriage of Miss Catherine G. Heim of Orland to Mr. Frank Detmar of 4643 W. Armitage ave., Chicago. The wedding is to take place sometime in June.

Mrs. David Kreuger is visiting in Muskegon, Michigan with her parents.

The Orland Park High School students held their annual banquet at Mickelberry's Tuesday night. At the close the students proceeded to the Crystal theatre.

Mrs. I. A. Cleveland, son Roy and daughter Shirley motored to Knox, Indiana last week to visit with relatives.

Marty Steinhagen is the new assistant Boy Scout Master.

The Wabash railroad is tearing up the south end of the passing tracks in Orland. This is to reduce maintenance costs and when the new viaduct is built it will be for one track only.

Next week will wind up the Suburban school baseball league. Trophies will be presented to the first three teams. These trophies are in graduated sizes finished in gold. They are in statuettes of soft ball players at bat. To date Orland is in first place. They have played eight games and won six, but two victories were contested and must be played over because Orland used an ineligible player in those games.

Team W L %
Orland Park 4 2 666
Worth 4 4 500
Forest Ridge 3 3 500
Palos Park 3 4 420
Stickney 3 4 420

Franklin Loebe left last week for Kalamazoo, Michigan.

A number of Orland people attended the concert at the St. John Evan. church in Mokena Sunday night.

ORLAND PARK HIGH SCHOOL NOTES

William Elkin, who graduated from our school last year, visited us on Friday. He has been attending school in Indiana and has the highest scholastic average of his class.

Miss Nellie McMahon our county supervisor visited our school last Tuesday afternoon.

The Art Class is making package design booklets.

The bookkeeping class is completing its final practical exercise practice set No. 3. The manual training class is working hard to complete all of the projects which they have started, before school is out. The geometry class is reviewing for the final exam on Friday.

Last Thursday our school took part in the Air Mail Week celebration. We met in front of the Orland post office where we listened to the speeches delivered by our local ministers. Then we went out to the port on Keane ave., where we welcomed the arrival of an air mail plane piloted by Mr. B. Schorfield.

There will be no school on Monday, which is Memorial Day, a legal holiday.

Next examinations will be given next Tuesday and Wednesday.

Continued rainy weather has held up the work of finishing the paving work on Keane ave., which still remains closed north of 159th Street.

Mr. and Mrs. Roy Erdman are the parents of a nine pound son born to them in Silver Cross hospital Thursday morning.

Joyce, five year old daughter of Mr. and Mrs. Fred Werner suffered severe burns on her right limb when a cup of hot coffee was accidentally spilled on her Tuesday morning. She is doing nicely.

Arthur Hurley underwent an operation for appendicitis in Silver Cross hospital last Thursday. He is improving nicely.

Mrs. Norman LaBuffy visited with Mrs. E. Schoeneck and family last Wednesday.

Mrs. Ralph Tucker of Kent, Washington, was a guest in the home of Miss Amelia Duncan last Friday. Miss Duncan's cousin, Arthur Tate of San Diego, Cal., is also a guest in her home.

Mr. and Mrs. Damann and Mr. Mrs. Hugh Deadmore of Joliet were guest in the August Hauck home last Tuesday evening. Pinochle was played.

Mrs. L. G. Bruder, Mrs. Robt. Bechtstein, Mrs. Rene Guindon and Mrs. Wm. Semmler were luncheon guests of Mrs. Roy Hannun in her home in Tinley Park Monday afternoon.

Bristol Steele is the proud possessor of a new Ford Sedan.

An appreciative audience enjoyed the fine concert program presented by the Elmhurst College Glee Club in St. John's Evan, church last Sunday night. The group, under the direction of Prof. Wildemar Hille, sang a number of sacred songs, negro spirituals and several offerings in a lighter vein. A mosquito song, dedicated to Rev. Theo. Haelele, was very clever and amusing.

Edward Schlundt, a member of the Glee Club sang a number of tenor solos.

A unique group on this concert program was that taken from the modern Russian opera, "And Quiet Flows the Don."

Prof. Hille, a noted concert pianist, rendered a number of piano selections which were much appreciated.

Following the concert, a social hour and refreshments were enjoyed in the church parlors by the Glee Club members and the young people of the church.

There will be no school on Monday, which is Memorial Day, a legal holiday.

Next examinations will be given next Tuesday and Wednesday.

Continued rainy weather has held up the work of finishing the paving work on Keane ave., which still remains closed north of 159th Street.

STRAIT GATE

By RUTH COMFORT MITCHELL

COPYRIGHT D. APPLETON-CENTURY CO., INC.

WNU SERVICE

CHAPTER VIII—Continued

Sarah Lynn drew Gunnar aside while the Hermod was being wheeled to the line. "It's a gorgeous thing to do—and I adore it! Look at him—almost expiring with bliss! But, Gunnar, he looks so sick—he has such a wretched color, and see how he breathes. I mean—suppose he has a weak heart?" She put an anxious hand on his arm.

He looked down at her, his gaze at once stern and gay, reckless and reasonable. "Thinking still with fear of death? You have not listened, then, while I told you? Life is one adventure; death is another! To be alive—that is nothing, unless life is good. Is he living in that foul hole? Better death in clean air! We go!"

CHAPTER IX

The Gate was richly golden, bathed and burnished in a strong metallic radiance, and the sun was sinking into the western sea in a molten blaze of unbelievable glory. Pop perched on the edge of his seat, looking off, looking down. His unpleasant pallor was enhanced and there was a pinched look about his nose and mouth. He was breathing badly, but his eyes were enraptured. He caught her scrutiny upon him and smiled at her, drawing a long, quivering breath, tipping his head back, relaxing like a swimmer about to float on a gentle sea.

The Hermod swooped and swirled like a gull, dipped and rose again. Sarah Lynn pulled herself to attention. This proud dominion over the fowl of the air and the fish of the sea was not a bird-like inconsequence but a business of infinite important detail, of levers and gears and hair-trigger precision. The sea-gulls, white dots against green-blue, far below them now, flew because they couldn't help it, but men flew because they had conquered.

The taxi-driver was waiting for them. "Hi, Pop," he said, "you better beat it! Lena, she's fit to be tied!"

The little man tried to thank Gunnar but he made only a series of embarrassed gurgles.

The flier gave him a comradely clap on the shoulder. "It is good! Now you remember always!"

Sarah Lynn escorted him back to the restaurant.

Driving back to Danavale she said again, "I want to come down in a parachute, Gunnar."

"Yes. After you have soloed for a month. Then I will take you."

"Take me?"

"You shall do it from the Hermod. I will remove the door, for your Department of Commerce, Conrad Jordan has told me, makes you wear two chutes when it is the jump of intention."

"Oh? In case one doesn't work? And it would be too bulky to get out through the door? But after I'm once out, it's perfectly simple, isn't it, Gunnar? Just to wait long enough to be clear of the ship before I pull the string?"

"That is all," he agreed. His mouth looked rather grim.

"Gunnar, did you mind when you did it?"

"On the ground, before, I had fear like a great sickness. In the air it left me."

Le Roy suggested her first flight alone in secret but she decided against it. It was due Great-granny and Uncle Lynn and old Penny if they wanted to come, and at the last instant she whispered to her young brother Bill. Bill's freckles, standing out like brown polka-dots on his pale face were the last things she thought about as she walked over to the plane.

She slipped round to the further side, unobserved, and laid her face against the Chinese lacquer red. "Don't be jittery, darling!" he whispered. "I won't even nick your hair-polish. I promise! I'll take you up like a swallow and bring you down like a leaf."

She got into the cockpit and went through the routine she had rehearsed again and again. It had become an integral part of her mental process.

The assistant sprang aside from the propeller.

"Clear!"

Clear, oh, clear! Forever and forever, life for the queer dark Dana girl, shining and clear.

Sarah Lynn pushed her throttle to the stop and Ladybug went forward with a roar, left the ground and began to climb into the wind. Sarah Lynn reached the altitude she wanted, readjusted her stabilizer to take the load off the joy stick, leveled off, banked to the left, building her own road as she flew. She exulted. "No matter what comes to me, if I live to be a hundred, I can never be as happy as this instant!"

The little ship quivered under her hands, sprang forward at her touch, dipped, soared. It was a living thing, vibrant, sensitive; delicate and dear; helpless in her care, depending upon her courage and skill.

"I'll take care of you!" Sarah Lynn pledged her plane.

Ladybug, Ladybug, fly away home!

Mary Dana Webster went to drink tea with Lynn Dana, an anxious pucker between her eyes.

"Ardine is perfectly poisonous about Sarah Lynn."

He shrugged. "Is it important?"

"Probably not, but it disturbs me. She's such an exceptionally good hater."

"Doubtless. What's the basis of it?"

"Partly disgust at having the ugly duckling turn into a skylark, and at yielding first place as Danavale's center of shocked interest, but chiefly on account of Jim Allison. She has worked it out in her nasty little mind that Sarah Lynn, by being the victim of her joke on Gunnar Thorwald, is responsible for his complete and final defection."

"And that goes deep?"

"Apparently. In her predatory fashion," his young kinswoman said, "she cares enormously. Did you know he'd been grounded? Yes. Drinking. Nice lad, to begin with, and what a mess she's made of his life!"

Lynn Dana nodded. "Of every life she really touches. Poor old Keaton!"

"I don't think he's ever come fully out from the ether," his cousin scorned him.

"But as to Sarah Lynn, I don't see, Mary—After all, the only two things in the world which matter to her are flying and Gunnar Thorwald. Ardine could no more ensnare him than she could take an ax to the plane, much as she would enjoy both activities. I really don't see what she can do."

"Well, I don't either, Uncle Lynn." Her plain and pleasant face lifted a little. "But just the same, she sort of worries me."

The parachute jump now held the limelight in Sarah Lynn's thoughts. She read and studied and asked questions and listened eagerly to Conrad Jordan and the ace, and Lynn Dana sat in his wheeled-chair and approved.

"Won't it be pretty bulky with two chutes, one in front and one behind?" she wanted to know.

"I have said I will remove the door," Gunnar reminded her.

"Then you can dive out, forward, and that's much handier than backing out," Conrad Jordan said, lighting a cigarette. "Then you'd have to push your way, with your back against the door, against the air-pressure."

Lynn Dana's amused gaze, slightly grim, went from one calm speaker to the other. "If you don't mind, Sarah Lynn, I'd rather like you to take whatever precautions suggest themselves."

"Of course, Uncle Lynn! I want to be sensible."

Sensible: the small, slight thing with her clear olive-and-ivory face and its crowding eyes, her fine, thin hands relaxed in her lap, planning this dazzling danger as casually as her cousins made dates to go dancing.

The mental reactions are very different," her uncle's flying friend said, "in a premeditated jump and baling out in an emergency, to save your life. All the breaks are with you now. You're going at the thing scientifically, you have no fear and no nerves, and I prophesy it's going to be a tremendous satisfaction to you, at the moment and in your memories. But I want to tell you frankly that you'll have some bad minutes before you go up." He leaned forward to knock off an ash.

"Never knew it to fail. The most hardened jumpers experience it, though I dare say in most cases it's purely physical and subconscious. I know a young chap at an airport who does exhibition jumps, but always before he goes up he turns deathly pale and his face and hands twitch. And the minute he climbs into the ship he's fine."

"Like a soldier in the trenches waiting the command to go over the top," Lynn Dana contributed. "Or, I remember before a big game, the agony of waiting, of wishing you had elected to play tidley-winks instead of football, and the departure of all doldrums when the whistle blew."

"Exactly. Tremendous relief in definite action: setting the body into directional motion toward a determined objective. Physical action replaces mental; fear evaporates. My conviction is that with a normal mind danger brings a calm and alertness and a cleverness far beyond ordinary experience."

"That I also believe," the Norwegian ace said.

Jordan went on. "There's the case of an English army officer, years ago. His chute caught in the ship and tore, leaving only the harness on him. He didn't know it, and the motion-pictures showed him calmly feeling round the harness and rip-cord, trying to figure why his umbrella didn't open, almost the whole way to the earth."

"Cheery anecdote," Lynn Dana said a trifle tartly.

"That was an old-fashioned affair, Lynn. Sarah Lynn'll have two modern, absolutely reliable chutes."

"Fool-proof," she grinned at him. "Fool-proof, which is superfluous in your case," he grinned back, approving her warmly. Lynn Dana's study pulsed with approval, with affection for her. Her uncle's lifelong devotion, the cordial friendship of his friend, the cool comradeship of the flying boy from Norway, What more, besides a Gipsy Moth, did a girl need for happiness?

Fliers did not marry.

"I have wondered if I'd really remember to pull the string," she said, "but I was reading Lieutenant Cramer's account of his first experience. An old-timer told him he couldn't keep his finger away from that ring if he tried!"

Jordan nodded. "Your only difficulty will be to wait until you are entirely clear of the ship." He faced Lynn Dana. "She'll have two chutes fastened to the webbed harness about her body. The main one has a 28-foot spread and the second a 24. That's on her chest."

"Made of silk?"

"Light, but entirely substantial. Both have pull-rings and rip-cords to unlatch and throw up the parachutes, and the rings are handily placed. You'll have everything clear in your mind a hundred times over, Sarah Lynn. The thing you must be prepared for is the scream and the flapping of the silk and the report, like a gun, and the violent jerk when your parasol opens. After that"—he ground out his cigarette—"it's really delightful."

"But—I was reading yesterday—when I'm almost down, with in a hundred feet of the ground—"

"Then you must reach up and hang onto the big rings above the sling in which you're sitting, and lift yourself, and take some of the bump out of your earth contact."

Sarah Lynn nodded gravely. "Uncle Lynn, what about Great-granny? Shall we tell her, and let her come out to the meadow and watch?"

He shook his head. "I'm against it, Sarah Lynn. She hasn't been up to the mark, lately, and it would be bound to be a strain—not understanding, as we do, the simplicity and safety of the thing. I believe you'd better tell her about it afterward."

"I expect you're right. But she'll be furious at us. I must go home, now, Uncle Lynn." She stood up, and Jordan and Gunnar rose.

"We must be on our way, too," the older man said.

"Yes. But I walk first with Sarah Lynn to her house," Gunnar answered.

They stepped briskly in the summer dusk, Lightning bounding ahead and racing back to touch her mistress' hand with her sharp cool muzzle.

"So, now you fly, and you make the great jump," the youth said soberly. "That is good. The courage you have; the skill you swiftly learn. I think my grandmother, living today, would be also like that."

Sarah Lynn fought back crazy laughter. Of all the round-about, detached and diluted compliments! His grandmother, a girl in her period, would be like her.

"I return, next month, to Norway. I have there the fine offers, one from the government, one from a great flying firm. It is wise that I go."

She heard herself making a faint sound.

"But I like well America, California. I will come again one day. And you, also, should visit my country."

"Oh, yes, indeed! Cousin Sally Ann has told me how glorious it is,"

she said clearly and cheerily, and told him good-by and ran in the house.

Well, what of it? Why not? Was there any reason why he should linger forever in an alien land? Fliers did not marry.

But fliers occasionally, it appeared, fell in love, achingly, absorbingly, terribly in love. She faced it then. "Idiot! You've known it for weeks—months—always! What's the use of lying to yourself? You may as well admit it; he'll never know."

The nonagenarian was beside Lynn Dana when he was driving out to the field for the parachute jump. She had guessed or divined what was to happen. "Can't fool your Gre'grammer!" She sat on the edge of the seat, the dabs of color which excitement always brought on her cheek-bones, her sunken eyes gleaming.

"I never saw the beat of that young one," she said complacently. "But you keep that ambulance out of sight, Lynn Dana, or I'll box your ears till you see stars, old as you are. Plumb foolishness, anyway. Sairy Lynn'll come down just as if she was playing on a feather-bed."

"Am I running true to form?" Sarah Lynn asked Conrad Jordan as they fastened her harness about her.

"No; a bit too calm and not pale enough, I should say," he told her cheerfully. Then he looked at Gunnar and away again, grinning, without comment. It was the hardy Norseman who was showing the regulation jumper's symptoms.

His ice-blue eyes blazed in a face of sudden snow; his young mouth was set in a taut line. "Come!" he called harshly.

All Sarah Lynn's slowness was overlaid with her equipment. "I feel like Tweedledum and Tweedledee both!" she laughed. She was comfortably casual in her brief good-bys, making no ceremony of farewell.

The Hermod, looking oddly crippled with its missing door, took off into a brisk wind. The flier did not look at his passenger nor speak.

"I wonder what makes him so deathly white?" she asked herself. "Just a detached interest in all branches of aerial conquest?" She felt suddenly gay. All her instructions were etched on her memory; she was past the traditionally bad moment of leaving the ground; she knew exactly what to do to get clear of the ship, and after that, she had been assured, the adventure would take on elements of distinct pleasure.

They climbed to a thousand feet, two thousand. The meadow fell away beneath them; human beings took on the value of playthings—puppet people with toy automobiles. There was likewise a toy ambulance.

At three thousand feet Gunnar nodded. "Ready? Now you go!" he shouted hoarsely.

Sarah Lynn stood up and made her bulky way toward the opening. She thought he was the palest living person she had ever seen.

"Fling yourself far from the ship. Make sure you are clear. Count a slow ten before you pull the cord!" His words came jerkily. "Wait! You are sure? You wish to go? There is no need, if you—"

Suddenly Sarah Lynn laughed aloud, filled with a wild mirth which was heady and sweet. "Still the fear of death?" she mocked him. "Life is one adventure; death is another!" She was confident, shining-eyed, radiant, but as she made a forward movement his arm shot out and caught her, pulling her against him.

(TO BE CONTINUED)

Candid Camera Pictures Interior of the Stomach and Other Cavities of the Body

"Tiny cameras which can be swallowed by the patient and which carry their own illuminating system have been used for photographing the interior of the stomach," Walter E. Burton discloses in his article, "X-Rays: A Way to Better Health Through Photography," in Hygeia, the Health Magazine.

Similar methods may be employed for making interior views of other body cavities. Furthermore, other methods have been worked out so that movies can be made of the vocal cords, the interior of the bladder, of the ear drum and other portions of the body.

Other startling innovations have been recently introduced in the field of photography that will greatly further medical research. Among them are actual color photographs of the interior of the eye, showing the optic nerve ending, blood vessels and other details. The pictures were taken through the crystalline lens and pupil of the eye, the pupil being dilated by drugs in order to provide a greater working area.

Infra-red photography has the ability to penetrate the skin and show details ordinarily invisible. While an ordinary photograph

shows only surface details, the infra-red picture makes the subcutaneous veins stand out almost as clearly as if they were on the surface.

Infra-red waves penetrate the deepest pigment. A negro, photographed with them, appears white, and although he may seem smooth shaven, he is seen to have a distinct beard, because the roots of the hairs in his face show.

Motion pictures have been made that show the course of blood flowing through an artery into a capillary, cancer cells that move and drink, and blood cells that devour bacteria and other harmful matter. Time-lapse photography was employed in filming the actions of these cells; that is, the exposures were made at such intervals that, when the film is projected at normal speed, movements of the cells are stepped up 40 times or more.

Why Leaves Change Color

Leaves change color in autumn due to the decaying chlorophyll, or green coloring matter, undergoing chemical changes, and to the exposure of pigment cells formerly covered.

Men of the Mounted

by Captain
G. Elliott-Nightingale

"GUNBOAT" INVENTS THE "SNOWBALL" BRAND

"GUNBOAT" CHARLIE, so named on account of his big feet, sat down by his little branding-fire puffing and winded, for he had just thrown and tied a young white-faced bull that would fetch a handsome price once he met up with anyone who really knew anything about that sort of animal. And, as he regained breath and poise, he gave some attention to the iron rod in the fire, moving the end of it well down into the red coals, for it must be plenty hot for the job he had on hand. And, as he waited, hemmed in by the blackness of a cloudy Saskatchewan night, he patted himself on the back for the way in which he had escaped detection. They were all plain dumbbells, even the Men of the Mounted, or they'd have caught up to him long ago. On the other hand, he was right smart, was "Gunboat," for he was wily and cunning, and he knew how to hide a branding-fire in the recesses of a gully or coulee. He just used his head, that's all, and as long as he did that, he'd be able to carry on. Moreover, he knew just where to find a buyer.

A few minutes later, red-hot rod in hand, he scooted rapidly over to the prostrate young bull and the bluish-white smoke from burning hair and hide was coiling upward into the night. With all the care and precision of a surgeon doing a difficult operation, "Gunboat" moved that red-hot iron over the original brand until he had made a nice round spot. "When that heals up it'll be kinda whitish, so we'll just call it the Snowball Brand," he muttered as he finished. Within the hour he had performed a like operation on the three fat steers, and then rolled into his blankets with the satisfaction of a man who had done a real workmanlike job. Every bit of the original brands had been burned out, and no one would ever know the difference. They'd sell, easy.

Nor was "Gunboat" overestimating his ability as a cattle salesman, for at the end of a month he had turned the deal at top prices and had a belt full of good Canadian cash. Well-heeled, "Gunboat" disappeared into the nowhere whence he had come. Buyer and seller had parted good friends, and everyone was satisfied until a Man of the Mounted looking for a hot meal and a night's lodging, chanced to meet up with the four animals carrying the "Snowball" brand.

"Bought 'em from a feller thet passed through here 'bout a month ago," replied the homesteader, a newcomer, to the Mounted Man's inquiries.

"Those scars look mighty suspicious, partner," opined the Man of the Mounted. "It wouldn't surprise me if you had unwittingly bought some stolen cattle . . . looks like the original brands have been burned out. Did he say where he bought them?"

"Yep . . . sed he got 'em in the Willow Bunch country . . . an' as fer the 'iginal brands bein' burned out . . . why . . . say . . . I'm a law-abidin' man an' if ye think they's somethin' wrong . . . I'll git saddled up an' help yer run him down . . . I ain't buying stolen cattle if I know it . . . not me."

"Well, hang on to those cattle until you hear from me," said the Man of the Mounted as he rode off next morning. Inside of a week he was back at the ranch.

"The only way we can find out the original brands is to kill one of them."

"Yo're plumb crazy . . . Mr. Mounted Policeman, how're ye goin' ter find out anythin' by killin' em? Moresover, what 'bout me? I ain't gonna take no loss. Paid money for them animals, I did."

"I'll see about that part of it. You won't lose a penny. Let's get busy," replied the Man of the Mounted as he dismounted and walked toward the nearest steer. Inside of half an hour the homesteader learned a lot about cattle-brands. In spite of the very thorough job of burning and searing "Gunboat" had done on the outside of the hide, the original brand showed up all too plainly on the flesh side.

Several weeks later "Gunboat" Charlie was apprehended in another province, and was soon on trial. It was a great day for the dignified and bewigged judge as the Man of the Mounted, spreading the steer-hide over the judge's bench, proved his point, that "Gunboat" had disfigured the original brand by the outside burning, but had failed to go more than half way through the hide and thus spoil the original brand that now showed up all too plainly on the flesh side of the skin.

On top of that, the owner of the original brand was in court, and he identified "Gunboat" as a man who had worked on his ranch for a couple of days and had then disappeared about the same time as four head of cattle. "Gunboat" was sentenced to two years at hard labor and, needless to say, from that time on no cattle or horse thief used the "Snowball" brand in that particular region.

Fine Lines, but—

Coleridge, seeing some of his early work, wrote in the margin: "Fine lines, if I do say so myself as shouldn't; but what they mean I do not know nor ever knew."

MILLIONS RELIEVED BY VEGETABLE LAXATIVE

If you suffer from constipation, here's an amazing relief. Relief so nearly natural you'll hardly realize you've taken a laxative except for the wonderful results you'll get. The reason Nature's Remedy—NR Tablets—acts this amazing way is simple. They are made by an exclusive formula from vegetable laxative ingredients and act on the true basic principle of aiding nature. Give gentle, thorough relief without upsetting the stomach—without griping. Leave you clear headed, refreshed, invigorated.

NR Tablets are all vegetable. Guaranteed to contain no salts, no phenol derivatives. Over 500 million NR Tablets have already brought welcome relief. Get a 25c box from your druggist. Whenever you need a laxative, get NR Tablets and get the sure, gentle, dependable relief millions enjoy.

Truth Beauty

Beauty is truth, truth beauty—that is all ye know on earth, and all ye need to know.—John Keats.

NERVOUS?

Do you feel so nervous you want to scream? Are you cross and irritable? Do you scold those dearest to you?

If your nerves are on edge, try LYDIA E. PINKHAM'S VEGETABLE COMPOUND. It often helps Nature calm quivering nerves.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure.

Make a note NOW to get a bottle of world-famous Pinkham's Compound today WITH-OUT FAIL from your druggist—more than a million women have written in letters requesting benefit.

Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?

Skill Wins

It is not strength, but art, obtains the prize, and to be swift is less than to be wise.—Homer.

DOUBLE-FACED

By JANNIS PARKER
© McClure Newspaper Syndicate,
WNU Service.

THE library of the Dickey estate was mahogany furnished, dark paneled. Huge chairs, heavily carved tables, and tapestries were grouped luxuriously under its high ceiling. Long logs snapped and crackled in the massive gray stone fireplace.

From other portions of the house floated sounds of merriment—guests disporting themselves in true house-party fashion.

In the library a man and woman were conversing in low, serious tones.

The woman was very lovely—slim, in an ivory satin evening gown, emerald pendants in her ears, her dark hair pointing low on her forehead in a pronounced widow's peak.

The man was older, iron-gray hair freezing to white, but with a young, full mouth and a glint in his woman-loving eyes that death alone could dim.

He sat, legs comfortably crossed, in one of the big leather chairs. The woman paced the heavy Oriental rug, snapping matches brittlely in her long, slim fingers. Her evening gown clung, swaying softly at her ankles as she moved.

"He's a nice boy, Lois," she said. Another match snapped in the woman's fingers.

"A darn nice kid," repeated the man. "And I'll wager he makes you a better husband than I did."

"Please, Conrad, not so loud!" The woman paused in her pacing. Her lovely brow was wrinkled anxiously.

The man slapped his leg delightedly. "Surely he knows you've been married before?"

The woman threw the splintered matches into the hungry logs. "Of course. But he never wanted to know who it was. Said that if he ever found out . . ."

"I know," broke in the man. "If he ever found out he'd strangle him with his bare hands."

He felt appraisingly at his straight-columned throat. "Much as I like to please my guests, being strangled doesn't fit into tonight's mood. Some other time, perhaps."

The woman sat down with a quick movement, hunched over and stared into the fire. Her hands twitched in her lap.

"The same Conrad," she half-murmured. "Come now," pleaded the man, patting one of her hands, "you've always looked at life out of such serious eyes, Lois."

He touched his white-glazed shirt with a light gesture. "Look at me!"

"Precisely what made me look at life seriously," she replied. "The more I looked at you, the more seriously life looked back at me."

The man assumed a mock hurt expression. "In a moment you'll be saying you never really cared for me—that you never knew what love was until you met this deuced attractive young husband of yours."

She turned on him fiercely. "You're just angling to have me say I never loved anyone but you! Why you want to be the motive for every woman to break up her life, I don't know!"

"Not every woman."

The man spoke with such quiet dignity and seriousness that Lois, married though she had been to him looked quickly, (was it almost hopefully?) into his gray eyes. But they were glinting back, as they always would. She flung herself away disgustedly.

"Let's join the others."

"But I want to discuss that young cub of yours," he put in. "I think he's got something. Of course all young inventors rave and bubble over, but that little gadget with all the wheels intrigues me. Yes, the lad seems somehow to smatter of real talent. What do you think?"

The woman turned to him. The fire glowed on her face. Her earrings swung sparkling.

"I think you have another little scheme up your sleeve. And what it is, only his Satanic majesty knows. Please, Conrad—I had no idea when the Millers insisted on dragging me to a magnificent house-party, that I was heading for my former home. And now, let's not discuss Tommy—let's join the others."

She started to leave but he pulled her back gently.

A couple was passing so she went submissively.

It would never do to be seen being pulled into a room by Conrad Dickey.

"You must outgrow this stubbornness," Conrad said. "I have no desire to talk about you!"—Lois' ivory cheeks stung under her quick flush—"I want to inquire into the career of that inventing husband of yours."

"There's nothing to inquire into as yet," she retorted. "Tommy's got an A-1 mind and he's using it. But crouching poverty isn't the ideal barrier to have confronting an inventor. I'm hoping he'll make it, praying he'll make it, and now, let's join the others."

He ignored her suggestion, telling her softly.

"Your prayer's been answered." She stopped abruptly on the heavy carpet.

"You likely remember the time your alimony stopped?" She bit her lip.

"Conrad, I refuse to be interested."

"The alimony stopped because of my business reverses," he went on, "not because I wanted to be cussed."

"No explanation is necessary."

"Well," he continued, "the reverses reversed, the homestead was saved, and the staff put in running order again. Hence, I'd like to make out your little check covering the lapsed months."

"The hitch?"

"No hitch."

"I'm still not interested." She turned to go.

"It would certainly help him a lot," he reminded her.

She hesitated.

"Come, it's not a gift, you know. It's your own money. Your alimony which lapsed and which was to terminate only in the event of your remarrying. I'll tell you—since you're so modest—we'll toss for it!"

She looked up into his eyes. They were still glinting but more mildly.

"Very well, but there's a trick in it some place."

"You think I'm terribly hard-hearted, don't you?"

"It's not a case of a hard heart or a soft one, but rather its absence."

He smiled, apparently satisfied. "Heads?" He suggested, his right hand in his right pocket.

"No. Tails."

His left hand took a coin from his left pocket, flipped it.

He scrutinized it very seriously and then beamed.

"Tails it is."

He took her arm and piloted her from the library.

"That little ten thousand will come in very nicely for Tommy."

He smiled, fingering the coin in his left hand pocket—the coin whose two sides were identical.

Lesson for May 29

MAINTAINING PERSONAL
EFFICIENCY

LESSON TEXT—Dan. 1:8-16, 19, 20; 1 Cor. 9:24-27.

GOLDEN TEXT—Every man that striveth for the mastery is temperate in all things. 1 Cor. 9:25.

PRIMARY TOPIC—How Daniel Pleased God.

JUNIOR TOPIC—Ten Times Strong.

INTERMEDIATE AND SENIOR TOPIC—In Training for the Game of Life.

YOUNG PEOPLE AND ADULT TOPIC—Liquor's Effect Upon Working Efficiency.

Personal efficiency is a subject which is receiving much attention in our day. There has never been so much accurate and usable information as we now have regarding diet, exercise, and medical care.

The mind as well as the body has come in for attention and scores of books are available on the development and full use of the powers of personality. Some of these are trash, but others are helpful.

Business is co-operating with the school and the home in giving boys and girls the opportunity to grow up to be useful and happy members of society. The church adds its important contribution, although we must confess that it is far from what it might be by the grace and power of God.

I. A Sound Mind in a Sound Body (Dan. 1:8-16, 19, 20).

Daniel and his three Hebrew companions had been brought to Babylon as captives, and were there chosen to enter the royal school for future service at the court. Every provision was made for the students chosen for that school. Their diet, however, included not only meat which was unclean to the Jew but wine, which Daniel knew to be undesirable. It took holy boldness to ask to be excused from that which the king had prescribed, but Daniel was blessed not only with courage, but with tact and courtesy. A ten-day test of a simple diet and water proved so successful that the plan was continued. At the end of the three-year course the Hebrews were not only physically stronger but mentally and spiritually superior.

The experience of Daniel and his brethren is not just an incident eagerly grasped at by "blue-nosed reformers" to prevent their neighbors from "enjoying" intoxicating liquor. The testimony of science, of business, of experience in all ages, proves that the use of even an amount of alcohol so small that the user does not feel its presence materially "reduces endurance, accuracy, and rapidity of muscular action of all kinds" (Emerson). It so cuts down the ability to think clearly and to react promptly to danger that it is absolutely taboo with such responsible workers as railroad engineers. It is not a stimulant, but a narcotic, which dulls the nerve centers. Dr. Edward Rosenow says, "The use of alcohol as a beverage is never justified. There is no such thing as the right use of beverage alcohol."

Such information as the above is available in publications of temperance organizations, books by various writers, and even in publications by state liquor commissions. It is published in newspapers and magazines and circulated by safety organizations and insurance companies. Yet, unbelievable as it may seem, the use of liquor is on the increase.

II. Success in Life Calls for Self-Control (1 Cor. 9:24-27).

Paul delighted in illustrations taken from the athletic field. He talked of running a race, of fighting a good fight. He knew the athlete's need of keeping his body under.

The one who serves his school or athletic association in physical competition gladly surrenders his personal liberty to the guidance of the coach. He eats carefully, sleeps full nights, exercises consistently, and above all does not use alcohol in any form. Listen to the words of great athletic coaches—Yost: "I would not waste my time trying to train or develop one who uses alcohol." Stagg: "Coaches and trainers are dead against the use of alcoholic liquors, even beer."

Paul rightly points out that all these sacrifices are made by men for what is but a transient earthly crown. How much more should we do for the sake of our souls. Temperance instruction may well stress the physical and mental degradation that follows the use of alcohol, but above all let us teach boys and girls that its use has sent countless souls to eternal punishment and separation from God. We should be deeply moved by the loss of personal efficiency, but what shall we say about the loss of a soul?

Faculty of Reason

Reason is a faculty of the mind by which it distinguishes truth from falsehood, and good from evil, and which enables the possessor to deduce inferences from facts, or from propositions.—Locke.

Sharing Our Joy

For there is no Man that imparteth his Joys to his Friend, but he joyeth the more; and no Man, that imparteth his Grievs to his Friend, but he grieveth the less.—Bacon.

Describes the Need for

IRON and COPPER

Shows How You Can Help to Avoid Anemia
by Including These Blood-Building
Minerals in the Diet

By C. HOUSTON GOUDISS

6 East 39th Street, New York City

OF ALL the nutrition problems that challenge the homemaker, none is more important than supplying her family's need for iron. This mineral is sometimes described as the supreme element in nutrition because it is an essential constituent of the blood.

How Blood Is Constructed

If you should examine a drop of blood under the microscope, you would observe that it is composed of red cells and white cells. In normal blood there are about 25 million times a million red blood corpuscles, owing their color to the iron-bearing protein hemoglobin. They carry oxygen to all the body tissues, and remove the carbon dioxide formed during the combustion of body fuel.

A reduction in the amount of hemoglobin in the blood may cause shortness of breath, quickened respiration and an accelerated heart action. Lack of appetite, weakness, and a slowing of all vital functions may also result from the diminished supply of oxygen to the tissues.

Lack of Iron May Lead to Anemia

In many young people the blood does not function normally, though frequently parents are unaware that anything is wrong. You may scold them for being lazy, for lacking interest in their work, or never heeding the things you tell them, when the real trouble is due to iron starvation which, if long continued, may lead to anemia.

The person who has a tendency toward anemia usually tires easily and lacks pep; complains of cold hands and feet; worries over trifles, and may have a complexion that is anything but rosy.

The great danger of an iron-deficient diet is that it deprives the body of its chief defense against disease. For when the quality of the blood is poor, one becomes an easy prey to infection. Moreover, if a serious illness occurs, lowered resistance makes it difficult to fight it off.

Two Forms of Anemia

Anemia may be due to loss of blood, deficient blood formation, or to increased blood destruction in the body. The different forms of the disease are sometimes classified as primary and secondary anemia.

Primary anemia is usually known as pernicious anemia. It is a grave condition in which the marrow of the bones has lost its power to make red blood cells.

Secondary or nutritional anemia may result from loss of blood in an accident, or it may follow a long, infectious illness. For any infection lowers the iron reserve in the body. But the most common cause is a diet lacking in

Are You
Overweight?
You can
REDUCE
Safely - Surely - ComfortablySend for This Free Bulletin
Offered by C. Houston Goudiss

Readers of this newspaper are invited to write to C. Houston Goudiss, at 6 East 39th Street, New York City, for his scientific Reducing Bulletin, which shows how to reduce by the safe and sane method of counting calories.

The bulletin is complete with a chart showing the caloric value of all the commonly used foods and contains sample menus that you can use as a guide to comfortable and beautiful weight reduction.

childhood, for it has been discovered that better health results when a surplus is allowed above the daily requirement. But there is a very special need for iron in girls from the beginning of adolescence through the eighteenth year.

Iron-Rich Foods

To maintain top health and prevent the possibility of nutritional anemia, the homemaker must learn to meet the daily iron requirement of her family and not leave this vital matter to chance.

Iron-rich foods include egg yolk, liver, molasses, dried beans and peas, whole grain cereals, lean meat and green leafy vegetables. While milk has only a small amount of iron, experiments show that its iron is readily absorbed and is utilized to good advantage.

Eggs are such an excellent source of iron that one egg yields about one-tenth of the standard requirement. Lean meat furnishes a considerable amount, but liver is so much richer that it should be eaten frequently. Dried beans are inexpensive and when baked with molasses become a good source of iron.

It is a pity that parsley is so often used only as a garnish, because it has a higher iron content than most green leafy vegetables. Though potatoes contain only a moderate amount of iron, they are usually consumed in sufficient quantities to make them a significant source.

Copper Also Necessary

Investigation has demonstrated that adequate iron alone is not enough to prevent nutritional anemia, for the body cannot convert iron into blood pigment unless copper is also present. Therefore, in order to obtain the full benefits of iron, the diet must contain sufficient copper. Foods that supply copper in abundance are liver, nuts, dried beans and peas. Smaller but significant amounts are provided by whole grain cereals, dried fruits and poultry.

I shall gladly send to every homemaker a list of foods rich in both iron and copper, and also sample menus showing how to plan a balanced, blood-building diet.

I urge you to write for this material and keep the blood-building foods in mind when planning menus. Never forget for an instant that good blood is the best form of life insurance.

"You Can't Beat It!" They Say
About Pepsodent with IRIUMIrium contained in BOTH Pepsodent Tooth Powder
and Pepsodent Tooth Paste

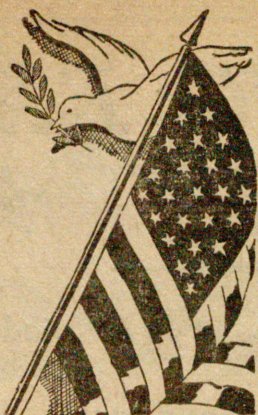

• All dentifrices may LOOK more or less alike. But looks are deceiving. Modernized Pepsodent, for example, is different, more effective. And for a definite reason! ONLY Pepsodent contains Irium!

Pepsodent containing Irium can polish

your teeth to a dazzling natural brilliance in record time.

And do it gently . . . SAFELY! For Pepsodent contains NO BLEACH, NO GRIT, NO PUMICE! Try it yourself . . . and SEE the difference!

On all fronts there are indications that America has risen from the depths of despair and there's a general trend toward optimism—particularly as to real estate. There is every indication that the supply of up-to-date homes and business property will soon be inadequate for the demand.

WHAT ABOUT YOUR PROPERTY?

TINLEY PARK, ILL.

Outdoor Movies at Tinley Sat. Night

For the first time in the history of Orland Park an outdoor talking movie will be shown sponsored by the business men of Orland Park. The movie will be presented by the Film Libraries of Chicago. The feature picture will be "The Lost Jungle" with Clyde Beatty world famous wild animal trainer in a thriller of the circus and jungle.

This movie will be held in the school yard of the Orland Park public school and will be free to the public. A portable screen 9 x 12 ft. will be used, this being the same size as regular theatre screens. The equipment is capable of satisfying the ears and eyes of a crowd of 1500 to 2000 persons. An amplifying system will be used to carry out the sound.

John Deere Tractor Cultivators

The time you can save with a John Deere on the cultivating job can be turned into money-making efforts somewhere else. Keep ahead of the weeds and the weather—get around faster and easier with a John Deere General Purpose Tractor and a two-row or four-row cultivator. No other tractor cultivating outfit gives you such a good view of your work. It has ample clearance for tall crops, and a roomy platform when you want to stand. Wheel tread adjustable 56 to 84 inches to fit row spacing. Hydraulic power lift. Quick, positive steering—individual braking of rear tractor wheels. Four forward speeds—the right speed at the right time. Come in and see this cost-reducing equipment.

HOW DID YOUR FURNACE FINISH THE WINTER?

Have it cleaned and repaired at our Special Summer Prices

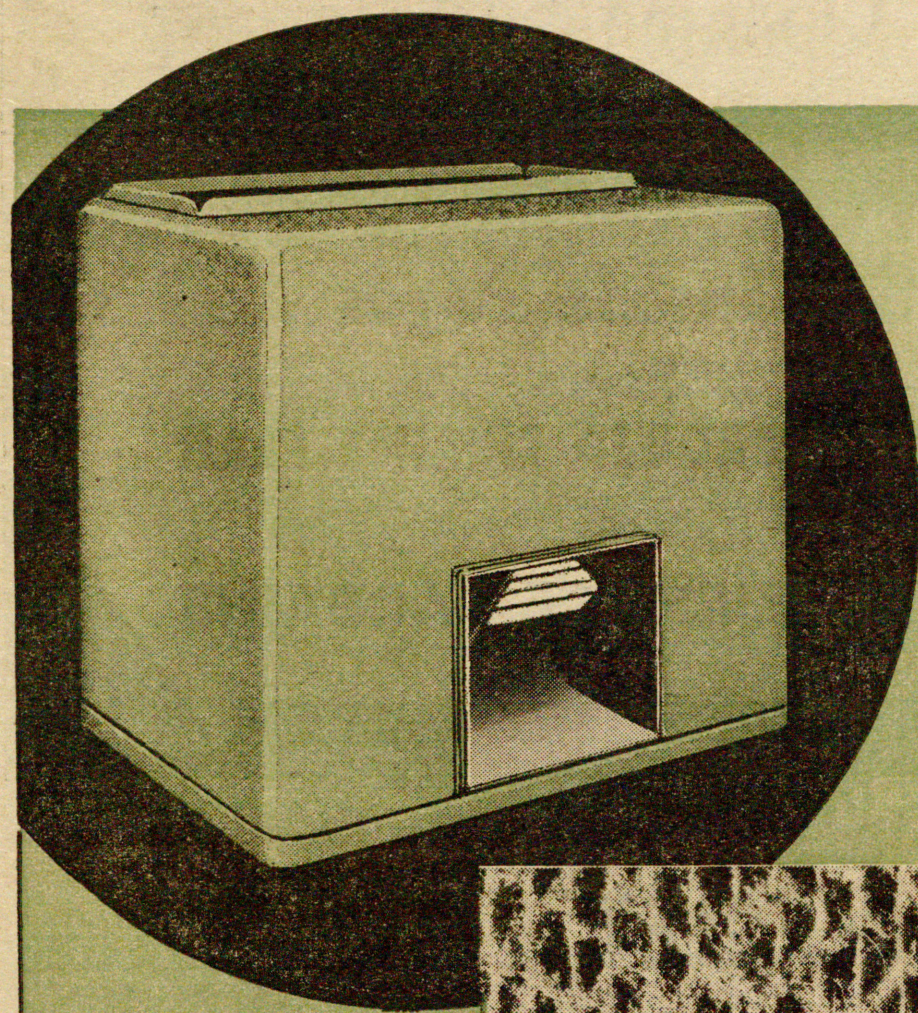

Maybe your furnace has an iron constitution—but months of steady firing are hard on it just the same.

Don't take a chance on having a smoky furnace—poor heat—extra work—excessive fuel bills next winter.

Have the soot and dirt cleaned out of your furnace, heat pipes and chimney. Make minor, inexpensive repairs NOW, at our present low prices and save money. No inconvenience—no delay, and you will be ready for the first cold snap next fall.

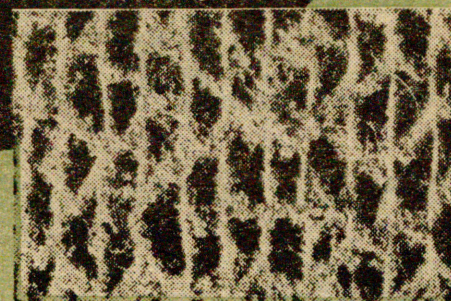

We clean and repair all makes of furnaces. No charge for inspection. Call us today!

IF YOU HAVE A "Hard to Heat" ROOM ATTACH A SUNBEAM BLOWER UNIT TO YOUR PRESENT FURNACE..

SUNBEAM BLOWER UNIT
which forces heat uniformly to all
rooms and removes dust, dirt and
other foreign matter from the air.

At right is shown a filter matted
with a few months' accumulation of
particles extracted from the air.

With a Sunbeam Blower Unit attached to your present furnace, you can have warm, purified air circulated under pressure throughout your home. And you save fuel too!

The powerful Sunbeam blower forces the heat to all parts of every room. Home owners who have installed a Sunbeam find that rooms which could not be heated under certain weather conditions in the past, are as warm as any other room in the house.

The filters, through which the air must pass as it enters the Unit, remove dust, dirt, lint, pollen and other foreign matter from the air. House work is lessened, and cleaning and redecorating expenses reduced. The removal of pollen from the air is a boon to hay fever sufferers.

In summer, as well as winter, you benefit from your Sunbeam. The Blower can be operated to provide cooling ventilation by the circulation of filtered air. At night, cool air is drawn into your home and the temperature is reduced in a short period of time.

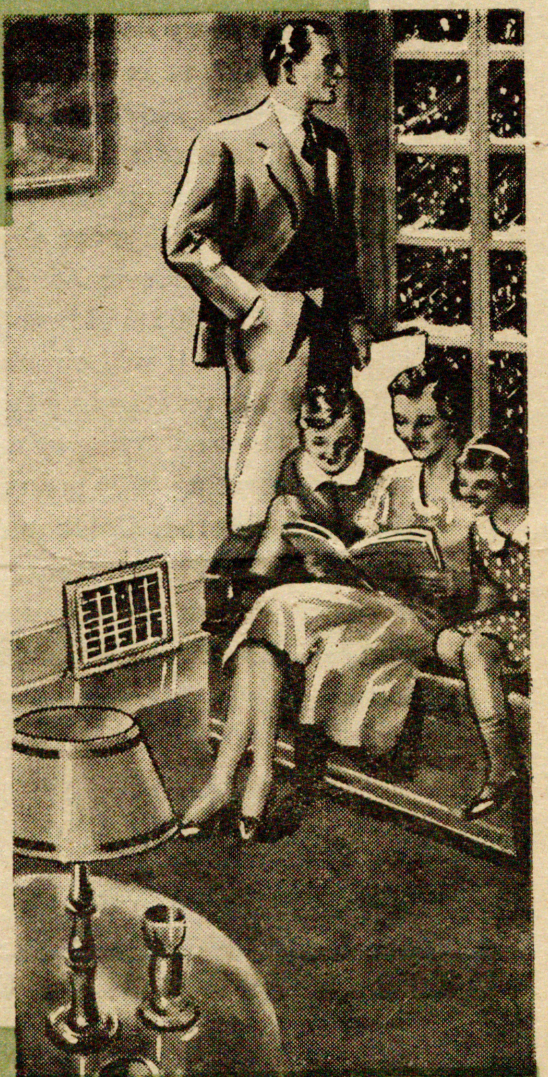

The low cost of modernizing your furnace with a Sunbeam Blower Unit will surprise you. Phone us for an estimate.

BUY YOUR NEW FURNACE NOW!

AVOID DELAY - - - - SAVE MONEY

You can prepare for next winter, avoid the fall rush—and at the same time **SAVE MONEY** by installing your new furnace now. By the terms of our F.H.A. approved finance plan, no down payment is required and you have one to three years to make the small monthly payments which are as low as \$10 a month. Our F.H.A. finance charges are the lowest in history. There is no delay. No red tape.

Don't wait until fall when workmen are busy and prices are higher. Avoid inconvenience, too, by having your new heating system installed now!

A NEW FURNACE GIVES YOU

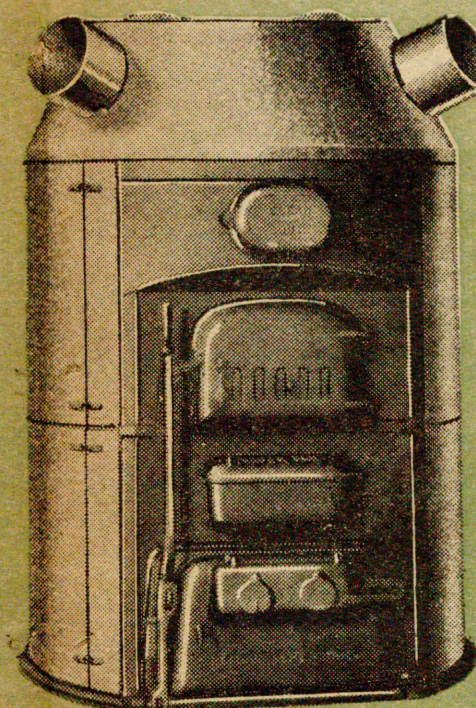

REDUCED FUEL BILLS - - - UNIFORMLY WARM ROOMS

If your furnace is worn out don't face another winter of high fuel bills, cold rooms and illness due to insufficient heat.

One of our modern heating systems installed in your home will pay for itself in reduced fuel bills. Every recent improvement that will save you money, bother, work and foot-steps is incorporated in them. There are models for burning coal, oil and gas.

You are sure of thoroughly satisfactory service when our experts install your heating system. Our reputation for skilled workmanship and dependability is your best guarantee.

A post card or a phone call will bring our representative.

FORGET THE FURNACE CHAINS! INSTALL OUR LOW PRICED AUTOMATIC DRAFT REGULATOR. When you attach this simple, inexpensive control to your present furnace or to your new furnace, you can forget about regulating the "drafts" and "checks". This instrument will automatically attend to the job for you.

1. Automatically maintains the temperature you desire.
2. Requires no thermostat.
3. Tends to the draft and check 24 hours a day.
4. Prevents overheating, thus saving fuel and protecting your furnace from damage.
5. Has no complicated mechanism.
6. Is very inexpensive.

THE WATER PAN NEVER NEEDS REFILLING WHEN YOU HAVE THIS AUTOMATIC HUMIDIFIER

When you install this humidifier you always have proper humidity without the bother of constantly refilling a thirsty water pan. This humidifier is connected to the water line and is filled automatically. It's inexpensive, too!

Treat Yourself to SUNBEAM Air Conditioning

You and your family can now enjoy the benefits of a modern air conditioning system right in your own home.

Sunbeam Systems are now within the financial reach of virtually every home owner. With one of these systems installed in your present home, or in the home you plan to build, you will have warm, filtered, humidified air circulated throughout your home during the winter. And what a difference this pleasant, balmy atmosphere makes! It is invigorating—comfortable; it reduces house work and eliminates winter illnesses caused by dry, stagnant air and improperly heated rooms.

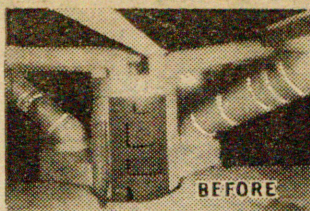

And your Sunbeam Air Conditioner is useful in summer! During hot days and nights, its blower-fan will provide cooling ventilation. After the sun goes down it will circulate cool night air throughout your home.

One of the outstanding features of the Sunbeam Air Conditioning System is its money saving economy. Cleaning and redecorating bills are reduced because the air is filtered. Colds and other winter illnesses which result from parched air and insufficient heat are eliminated. The humidified air preserves woodwork and furniture.

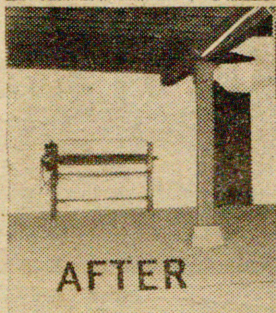

SUNBEAM
AIR CONDITIONING
MODELS FOR COAL, GAS, OIL

HAVE THAT EXTRA BASEMENT SPACE YOU HAVE ALWAYS WANTED

The Sunbeam Unit is placed against the wall or in a corner. Ducts are against the ceiling—out of the way. The basement becomes one of the most useful portions of the home; a recreation room, children's play room, den or spacious laundry.

BEFORE

AFTER

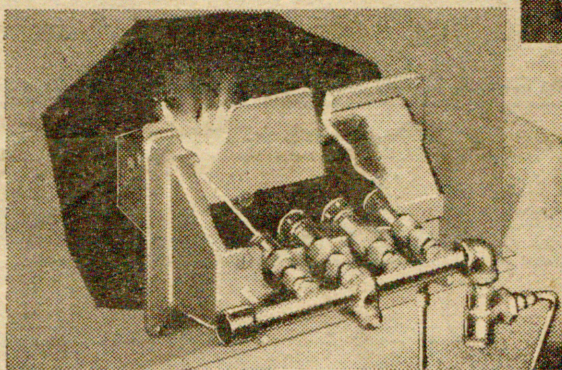

ENJOY PROPER SLEEP ON WARM NIGHTS

The circulating system ventilates during the day and fills the home with cool night air after sunset.

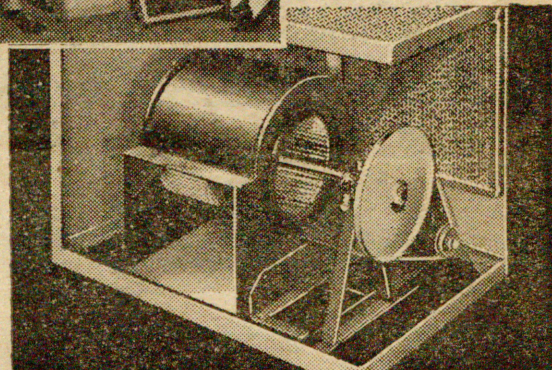

THE AIR IS PURIFIED

Efficient filters remove dust, dirt, lint, soot, pollen and other foreign matter from the air. Clean air means better health.

MOIST AIR IS REFRESHING

Humidified air is invigorating. It does not deprive the body of needed moisture—there is less winter illness. Also, furniture and woodwork do not dry out. Spray humidifier is illustrated.

CONDITIONED AIR IS CIRCULATED

This blower distributes the warm, purified and humidified air to all parts of every room. In summer this same powerful blower will provide cooling ventilation by circulating the air.

This illustration shows the moderately priced Sunbeam Air Conditioning Unit that creates a healthful, balmy climate all winter long—and provides cooling ventilation on hot, sultry summer days and nights. The Sunbeam is manufactured by The Fox Furnace Company, Division of American Radiator and Standard Sanitary Corporation, world's largest manufacturers of heating and residential air conditioning equipment.

1. RETURN AIR DUCTS

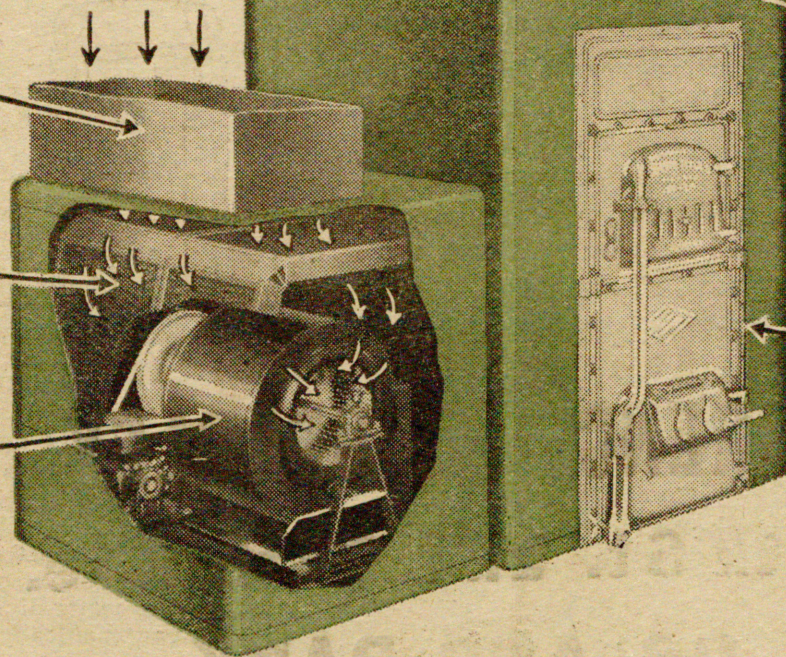

This duct is connected to Return Air Grilles located in various rooms of the home. Air drawn from the rooms passes through this duct to the Unit.

2. AIR FILTERS

The air must pass through efficient Sunbeam Filters as it enters the Unit. This operation removes 90% of the dirt, dust, germs and pollen present in the air.

3. SILENT BLOWER

This powerful blower forces the conditioned air to every room, under pressure, regardless of wind and weather condition; provides cooling ventilation in hot weather.

4. WARM AIR DUCTS

This duct leads from the air conditioner to registers in the rooms and distributes the conditioned air throughout the home.

5. AUTOMATIC HUMIDIFIER

The air is moistened automatically by this device. Moist air feels warmer at 68° than dry air at 72°. Lower temperatures can be maintained thus conserving fuel.

6. HEATING COMPARTMENT

Air drawn from the rooms by the blower passes into this compartment and is warmed by the heavy, leak-proof, long-lived heating element. Room temperatures can be automatically maintained by thermostatic control.
